Please note: In order to receive quality digital signals you may need an aerial upgrade.

There are 3 main reasons why you **may** need to upgrade your aerial:

1. Your current aerial and cabling may not be able to receive all the digital channels due to their age and condition.
2. In your location the digital channels may be transmitted on a different frequency to your existing analogue signal and you may require a different type of aerial to receive them.
3. The new digital channels may be transmitted from a new transmitter and if this is the case the aerial would have to be re-aligned. Alternatively you could aim to point aerial in your current.
