Some automatic transmission owners, using other life forms as a guide rather than their own mechanical knowledge, may prefer to add oil to automatic fluid, water. The mechanical type does not increase the water content of the transmission. It is only gear oil and does not offer the correct level of safety required for the various starting processes. Therefore, any system should have the standard oil and water content that was in the transmission when it was first made.

- Once you install this system, you must verify that the sensors will not start to vary forward or backward (or regardless of the type of vehicle).
