## **Maths Part1 Target Digest All:**

**Math is Precise, Period, vs. Math is Precise, Strings Attached** William J. Adams,2010-01-18 This book is the outcome of my conclusion that current mathematics education taken in total is a disaster and that by sharing my experience and thoughts about teaching mathematics I might be helpful to colleagues students and others who are concerned about mathematics education to mitigate this state of affairs Mathematics education disaster in what sense No it s not in the sense that I believe insuffi cient attention is being given to number fundamentals It has to do with the almost unanimously held erroneous view about the nature precision and infallibility of mathematics that we acquire from the current state of mathematics education Current mathematics education does not prepare us for life in the 21st century which requires an understanding of the mathematical modeling perspective of what mathematics can do and its limitations and an appreciation of the questions that should be considered to help us distinguish numbers that inform from those that deceive If the wizards of Wall Street had a 21st century mathematics education there is a good chance that they would not have put unquestioning faith in their value at risk math models and the fi nancial meltdown of 2008 09 would have been avoided or at least softened If the nation s decision makers and the public at large were better educated about what questions to give thought to when numbers continually hurled at them are the basis for decision making they would be less vulnerable to accepting faulty numbers and all of us would be less at risk to the consequences of bad decision making Digest ,2005 Mathematics of Data Fusion I.R. Goodman,R.P. Mahler,Hung T. Nguyen,2013-03-14 Data fusion or information fusion are names which have been primarily assigned to military oriented problems In military applications typical data fusion problems are multisensor multitarget detection object identification tracking threat assessment mission assessment and mission planning among many others However it is clear that the basic underlying concepts underlying such fusion procedures can often be used in nonmilitary applications as well The purpose of this book is twofold First to point out present gaps in the way data fusion problems are conceptually treated Second to address this issue by exhibiting mathematical tools which treat combination of evidence in the presence of uncertainty in a more systematic and comprehensive way These techniques are based essentially on two novel ideas relating to probability theory the newly developed fields of random set theory and conditional and relational event algebra This volume is intended to be both an update on research progress on data fusion and an introduction to potentially powerful new techniques fuzzy logic random set theory and conditional and relational event algebra Audience This volume can be used as a reference book for researchers and practitioners in data fusion or expert systems theory or for graduate students as text for a research seminar or graduate level course **The Condition of Education 2013** Susan Aud,Sidney Wilkinson-Flicker,2013-11-18 NOTE NO FURTHER DISCOUNT FOR THIS PRODUCT TITLE OVERSTOCK SALE Significantly reduced list price The Condition of Education 2013 summarizes important developments and trends in education using the latest available data The report presentsindicators on the status and

condition of education The indicators represent a consensus of professional judgment on the most significant national measures of the condition and progress of education for which accurate data are available To help inform policymakers and the public about the progress of education in the United States Congress has mandated that the National Center for Education Statistics NCES produce an annual report The Condition of Education This year's report presents 42 indicators of important developments and trends in U S education These indicators focus on population characteristics participation in education elementary and secondary education and postsecondary education Condition shows in 2012 about 90 percent of young adults ages 25 to 29 had a high school diploma or its equivalent and 33 percent had a bachelor's degree or higher As in previous years annual median earnings in 2011 were higher for those with higher levels of education for example 25 to 34 year olds with a college degree earned over twice as much as high school dropouts The Condition of Education 2013 includes the latest data available on these and more key indicators As new data are released the indicators will be updated and made available Along with these indicators NCES produces a wide range of reports and data to help inform policymakers and the American public about trends and conditions in U S education As this year's In 2011 almost two thirds of 3 to 5 year olds were enrolled in preschool and nearly 60 percent of these children were in full day programs At the elementary and secondary level there were about 50 million public school students in 2011 a number that is expected to grow to 53 million in the next decade Of these students nearly 2 million attended charter schools Postsecondary enrollment in 2011 was at 21 million students including 18 million undergraduate and 3 million graduate students NCES's newest data on elementary and secondary schools show that about one in five public schools was considered high poverty in 2011 meaning that 75 percent or more of their enrolled students qualified for free or reduced price lunch up from about one in eight in 2000 In school year 2009-10 some 3.1 million public high school students or 78.2 percent graduated on time with a regular diploma And in 2011 about 68 percent of recent high school completers were enrolled in college the following fall Meanwhile the status dropout rate or the percentage of 16 to 24 year olds who are not enrolled in school and do not have a high school diploma or its equivalent declined from 12 percent in 1990 to 7 percent in 2011 At 4 year colleges in 2011 nearly 90 percent of full time students at public and private nonprofit institutions were under the age of 25 However only about 29 percent of full time students at private for profit colleges were while 39 percent were between the ages of 25 to 34 and another 32 percent were 35 and older About 56 percent of male students and 61 percent of female students who began their bachelor's degree in the fall of 2005 and did not transfer had completed their degree by 2011 In that year there were 1.7 million bachelor's degrees and over 700,000 master's degrees awarded
