Contemporary Issues in Finance Jagadeesha, Shivakumar, Deene, 2009

The Truth about Economics Michael Ryan, 2017-12-06 This book presents a fascinating story about how academia got it all wrong Was it an academic conspiracy Was it peculiar social pressures in academia Regardless of how it all came about it is time to teach our children financial literacy instead of economics Financial literacy is a course that prepares our children for success in today's economic society Typical economics courses do nothing to prepare your child for understanding day to day economic responsibility This book presents the reasons to join the battle It is time to stand up and demand relevant education from your state education system

Economies of Representation, 1790?2000 Leigh Dale, 2017-11-30 Although postcolonialism has emerged as one of the most significant theoretical movements in literary and cultural studies it has paid scant attention to the importance of trade and trade relations to debates about culture Focusing on the past two centuries this volume investigates the links among trade colonialism and forms of representation posing the question What is the historical or modern relationship between economic inequality and imperial patterns of representation and reading Rather than dealing exclusively with a particular industry or type of industry the contributors take up the issue of how various economies have been represented in Aboriginal art in literature by North American Caribbean Portuguese South African First Nations Australian British and Aboriginal authors and in a diverse range of writings that includes travel diaries missionary texts the findings of the Leprosy Investigation Commission early medical accounts and media representations of HIV AIDS Examining trade in commodities as various as illicit drugs liquor bananas tourism adventure fiction and modern Aboriginal art as well as cultural exchanges in politics medicine and literature the essays reflect the widespread origins of the contributors themselves who are based throughout the English speaking world Taken as a whole this book contests the commonplace view promoted by some modern economists that trade in and of itself has a leveling effect equalising cultures places and peoples demonstrating instead the ways in which commerce has created and exacerbated differences in power

Economics, Principles and Problems James Ernest Moffat, Lionel Danforth Edie, 1946

The Irreconcilable Inconsistencies of Neoclassical Macroeconomics John Weeks, 2012-02-23 In the course of this book it is argued that the loss of what is essentially macro in Keynes is the result of a preference for a form of equilibrium analysis that gives unqualified support to the ideology of free markets In the case of Marx his theory of exploitation and from this the stress on class struggle led to an almost complete neglect of his contribution to the analysis of the aggregate demand and supply of commodities
