Presenting Problem

The client presented signs of distress and challenges related to personal and professional life that were intruding on mental health. At initial stages, the client showed signs of anxiety and mild depression.

Progress and Response to Intervention

The client has shown commendable adaptation and progress through the course of the interventions. The therapeutic procedure employed has assisted the client in building resilience and learning better coping mechanisms. Anxiety symptoms have noticeably reduced, and client outlook has improved consistently, which is indicative of progress.
