Computing is an international conference series dedicated to the promotion and advancement of all aspects of parallel computing. The major themes can be divided into the broad categories of hardware, software, algorithms and applications for parallel computing. The objective of Euro Par is to provide a forum within which to promote the development of parallel computing both as an industrial technique and an academic discipline, extending the frontiers of both the state of the art and the state of the practice. This is particularly important at a time when parallel computing is undergoing strong and sustained development and experiencing real industrial take up. The main audience for and participants in Euro Par are seen as researchers in academic departments, government laboratories and industrial organisations. Euro Par aims to become the primary choice of such professionals for the presentation of new results in their specific areas. Euro Par is also interested in applications that demonstrate the effectiveness of the main Euro Par themes. Euro Par has its own Internet domain with a permanent web site where the history of the conference series is described: <http://www.euro-par.org>. The Euro Par conference series is sponsored by the Association of Computer Machinery and the International Federation of Information Processing.

Euro Par 2001 Euro Par 2001 was organised by the University of Manchester and UMIST. Network World, 2002-10-28. For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Autonomic and Trusted Computing Juan González Nieto, Guojun Wang, Wolfgang Reif, Jadwiga Indulska, 2009-06-22. This book constitutes the refereed proceedings of the 6th International Conference on Autonomic and Trusted Computing ATC 2009 held in Brisbane, Australia, in July 2009, co-located with UIC 2009, the 6th International Conference on Ubiquitous Intelligence and Computing. The 17 revised full papers presented together with one invited paper and one keynote talk were carefully reviewed and selected from 52 submissions. The regular papers are organized in topical sections on organic and autonomic computing, trusted computing, wireless sensor networks and trust.
