MacNeil, 2023-06-01 This Research Handbook is a one stop resource on global capital markets and the laws that regulate them Featuring contributions from leading global experts the Research Handbook delves into a range of issues including investment products such as equity finance sustainable finance fintech impact investing and private equity It also provides analysis on institutional and procedural issues such as large and small companies capital formation the roles of institutional shareholders and information providers and the practices and regulation of financial trading markets      **Banking Regulation in Israel** Ruth Plato-Shinar, 2016-09-15 In the aftermath of the 2008 global financial crisis many governments are seeking ways to improve their banking regulation systems in the interests of both economic health and consumer protection Among the globally competitive countries that withstood the crisis with no significant disruption Israel stands out suggesting that other countries might benefit from an in depth analysis of its banking system This is the first book in English to provide such an analysis emphasizing the crucial balance between prudential regulation and conduct of business regulation which in Israel are both regulated by the same agency unlike the Twin Peaks model that prevails in other market based economies With recommendations that are highly applicable to many countries the book examines a broad range of issues that are of current concern to the banking community worldwide Among these issues are the following the architecture of financial regulation nationalization and privatization of banks conflicts of interest in the banking system resulting from universal banking problems of concentration and lack of competitiveness in the banking system the growing power of institutional investors and their entry into traditional banking activities mechanisms for recovery and resolution in the event of a bank failure new models of banking regulation such as self regulation and contractual regulation and bank consumer protection complaint handling and redress Even though the book focuses on Israeli banking regulation its detailed attention to the development of a suitable supervisory model is of immeasurable international value for regulators lawyers bankers academics and business people who are in any way connected to the banking world particularly following the 2008 crisis and its devastating effects It is sure to be of service as many jurisdictions continue to search for optimal tools designed to prevent another such crisis

*OECD Corporate Governance Factbook 2023* OECD, 2023-09-11 The OECD Corporate Governance Factbook provides easily accessible and up to date information on the institutional legal and regulatory frameworks for corporate governance across 49 jurisdictions worldwide Issued every two years the Factbook complements the G20 OECD Principles of Corporate Governance and serves as a useful tool to track how the Principles are being implemented      **A Comparative Study of Funding Shareholder Litigation** Wenjing Chen, 2017-04-25 This book studies the funding problems with shareholder litigation through a functionally comparative way In fact funding problems with shareholder lawsuits may largely discourage potential shareholder litigants who bear high financial risk in pursuing such a claim but on the other hand they may not have

much to gain Considering the lack of incentives for potential shareholder claimants effective funding techniques should be in place to make shareholder actions function as a corporate governance tool and discipline corporate management The book analyzes among others the practice of funding shareholder litigation in the Australia Canada the UK the US and Israel and covers all of the typical approaches being used in financing shareholder litigation in the current world For instance Israel and Canada Quebec and Ontario are probably unique in having a public funding mechanism for derivative actions and class actions while Australia is the country where third party litigation funding is originated and is growing rapidly Based on this comparative research the last part of this book discusses how to fund shareholder litigation in China in context of its social and legal background and what kind of problems need to be solved if certain funding techniques are used *Promoting Information in the Marketplace for Financial Services* Paul Latimer,Philipp Maume,2014-11-14 This book provides a unique comparative and global analysis of the regulation of disclosure in financial securities markets It is written by two authors who represent both the new world Australia and the old world Germany The authors present their research in the global business context with legal and regulatory perspectives including some references from Africa Asia the Middle East and South America After every boom and bust legislators pass new disclosure legislation often in a heated environment fuelled by politics and the media Little regard is paid to existing regulation or the lessons learned from earlier regulation The result is the continuing enactment of redundant and overlapping disclosure laws Since financial markets are often described as markets for information the failure to ensure disclosure is at the heart of financial services regulation This book argues that the solution to the failure of disclosure is a brief easily understood principles based plain English safety net amendment to statute law such as you must keep the financial market fully informed a measure that would support effective mandatory continuous disclosure of information to financial markets This book examines the reasons for disclosure regulation and how the efficient operation of financial markets is dependent on disclosure It examines the adequacy of common law and civil law concerning broker client disclosure and concludes that industry licensing in itself fails to keep the market informed While recognizing the failures of securities commissions to achieve good disclosure in financial markets it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets such as the stock exchange Coregulation builds on financial market self regulation and is best described in the words of one time SEC Chairman William O Douglas who in the 1930s described it as a shotgun behind the door **Annual Report Bank** Yiśra'el,2005 Ulrich's International Periodicals Directory Carolyn Farquhar Ulrich,2001 **Annual Report of the Public Service Commission, and the ...
