Sex and Gender Hilary M. Lips,2020-04-10 Are sex and gender really two different things How malleable is gender identity Do both gender and sex have to be conceptualized as binaries as having two distinct but complementary categories Should we emphasize gender differences or is that the wrong question When should we call a gender difference small Are women really nonaggressive or does that label stem from stereotyping How does subtle or modern sexism work on its targets Scholarship on these and other gender related questions has exploded in recent years Hilary Lips synthesizes that research for students in an accessible and readable way Concepts on sex and gender are presented with the social context in which they were developed As in previous editions Lips takes a multicultural approach discussing the gender experiences of people from a wide range of races cultures socioeconomic statuses and gender and sexual identities She emphasizes empirical research but takes a critical approach to that research Origin, Evolution, Environmental Impact of Oceanic LIPs Clive R. Neal,William W. Sager,Takashi Sano,Elisabetta Erba,2015-05 The origin evolution and environmental impact of large igneous provinces LIPs represents a topic of high scientific importance because the magmatism associated with these features cannot

be directly related to plate tectonics and because the eruption of flood basalts may have global environmental consequences Oceanic LIPs are even more poorly understood due to their relative inaccessibility This volume takes a multidisciplinary approach to understanding LIP origin evolution and environmental impact in ocean basins Papers that focus on plate tectonic reconstructions petrologic and geophysical investigations of various LIPs and sedimentological and micropaleontological evidence of syn LIP sediments are presented Precious materials and data from dredging cruises and scientific ocean drilling expeditions have made this volume possible
