The Best American Science and Nature Writing 2018 Tim Folger, 2018 Best selling author Sam Kean edits this year's volume of the finest science and nature writing **Restoring the Balance** John A. Vucetich, 2021-10-12 A renowned scientist studies wolves on a wilderness island searching for what it means to better relate to the natural world

Key-word-index of Wildlife Research ,1989 **Park Science** ,1981 Wolf L. David Mech, 2012-05-16 Throughout the continents of Eurasia and North America primitive man evolved in association with wolves. Wolves competed with him as a hunter and raided his flocks and herds. Inevitably folklore became rich in tales of this powerful resourceful creature. Europeans reached North America with their attitudes already formed. The wilderness pressed in upon their tiny settlements in constant threat and all energies were devoted to destroying it and turning its inexhaustible resources to use. Over vast areas of the continent the wolf went down with the wilderness before the unprecedented effectiveness of our technological attack on the ecology of a continent. Today however there is a great tide of concern over the consequences of our assault on the wild lands and wild creatures on the continent and more and more biologists are devoting their knowledge and energy to searching studies of our land and its native biota. The wolf has been the subject of detailed study by a number of ecologists on this continent who make use of all the research devices now available. Much of our knowledge is very recent is increasing rapidly and has resulted from the work of a mere handful of keen resourceful and courageous students of wolf biology. This the first book to attempt a complete account of the biology of the wolf draws from years of field research and upon the rich literature from two continents. From the foreword by Ian McTaggart Cowan *Environmental Science* William P. Cunningham, Barbara Woodworth Saigo, 1999 Introducing students to environmental science without any prerequisites this text has a strong global emphasis and recognizes that the world is a unified biosphere that doesn't adhere to artificial political boundaries. Topics covered include the Greenhouse Effect the Clean Air Act and El Niño **An Experimental Translocation of the Eastern Timber Wolf** Thomas F. Weise, 1975 Key-word-index of Wildlife Research Rolf Anderegg, 1994 **Imprint** ,2001 *American Men of Science* ,1949 The Living World Basic Concepts George Johnson, 2005-04-01 **Annual Report ...
