*BK Channels: Integrators of Cellular Signals in Health and Disease* Thomas M. Weiger,Alex Dopico,Anton Hermann,2017-11-10 Maxi calcium activated potassium channels BK are an amazing category of ion channels which are found in cellular plasma membranes as well as in membranes of intracellular organelles The function of these channels is to repolarize any excited membrane by passing a potassium outward current in response to depolarization and or increase in local calcium levels Thus voltage and calcium ions are involved in gating the channel under physiological conditions This dual activation makes them perfect sensors for many cellular events that require integration between intracellular calcium levels and electrical signals A plethora of physiological and pathophysiological functions such as membrane hyperpolarization modulation of synaptic transmission hormone secretion or mental deficiencies vaso regulation epilepsies heart diseases myotonic dystrophies hypertension etc in almost all cells and tissues were reported for these channels BK channels are main targets for important ligands like alcohol and gaseous neurotransmitters such as NO CO or H<sub>2</sub>S to name a few In the last years the molecular entities and mechanisms involved in modulation of BK channels have gained tremendous attention as the key role of these channels in cellular processes became increasingly recognized Indeed accessory proteins such as slob beta and gamma subunits all serve to modulate the channel gating characteristics Moreover channel subunit expression and function is further tuned by phosphorylation dephosphorylation processes redox mechanisms and the lipid microenvironment of the BK channel protein complex This e book contains structural and functional aspects of BK channels channel modulation by a variety of agents and cellular components as well as the channel s relevance in health and disease      *Narration as Argument* Paula Olmos,2017-05-09 This book presents reflections on the relationship between narratives and argumentative discourse It focuses on their functional and structural similarities or dissimilarities and offers diverse perspectives and conceptual tools for analyzing the narratives potential power for justification explanation and persuasion Divided into two sections the first Part under the title Narratives as Sources of Knowledge and Argument includes five chapters addressing rather general theoretical and characteristically philosophical issues related to the argumentative analysis and understanding of narratives We may perceive here how scholars in Argumentation Theory have recently approached certain topics that have a close connection with mainstream discussions in epistemology and the cognitive sciences about the justificatory potential of narratives The second Part entitled Argumentative Narratives in Context brings us six more chapters that concentrate on either particular functions played by argumentatively oriented narratives or particular practices that may

benefit from the use of special kinds of narratives Here the focus is either on the detailed analysis of contextualized examples of narratives with argumentative qualities or on the careful understanding of the particular demands of certain well defined situated activities as diverse as scientific theorizing or war policing that may be satisfied by certain uses of narrative
