## **May 2014 Grade 12 Caps Test Papers:**

*Assessing Academic Literacy in a Multilingual Society* Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

**A Theory of Applied Linguistics** Albert Weideman, 2024-08-21 This book adopts as conceptual focus the technical mode of experience exploring this characteristic mode of design as the angle from which the discipline of applied linguistics takes its cue. What makes applied linguistic concept formation possible? A number of elementary concepts and ideas are so basic to the discipline that they can neither be ignored nor avoided. These primitives are identified by examining the connections among the technical and other modalities such as the spatial, the physical, the social, economic, aesthetic, juridical and the ethical. A theory of applied linguistics must be robust enough to do justice to different modernist and postmodernist paradigms operating in the discipline systematically identifying and assessing their strengths and blind spots. The book offers a response to the question of the usefulness of theory. The principles of design revealed in the theoretical analysis are given shape in developing imaginative language interventions to solve vexing language problems not for the sake of theory but for the benefit of those affected. The book is intended for use both as a reference and as a comprehensive unifying perspective of what the field is by scholars in applied linguistics and related fields: TESOL, ESL, ESP, EAP, SLA studies, language assessment and testing, language policy development by postgraduate students or those who teach or study applied linguistics.

**Post-admission Language Assessment of University Students** John Read, 2016-08-10 English medium universities around the world face real challenges in ensuring that incoming students have the language and literacy skills they need to cope with the demands of their degree programmes. One response has been a variety of institutional initiatives to assess students after admission in order to identify those with significant needs and advise them on how to enhance their academic language ability. This volume brings together papers from Australia, Canada, Hong Kong, New Zealand, Oman, South Africa and the United States written by language assessment specialists who discuss issues in the design and implementation of these post-admission assessments in their own institutions. A major theme running through the book is the need to evaluate the validity of such assessments not just on their technical quality but on their impact in terms of giving students access to effective means of

developing their language skills and ultimately enhancing their academic achievement
