Anisotropic Layers in Waveguides Carl Martin Arft,2004 **Integrated Optics** Reinhard März,1995 This work addresses integrated optics from both the theory and practical modelling standpoints describing recent work on beam propagation planar spectrographs four wave coupled mode array CAD for integrated optics and component cost modelling Fiber Bragg Grating Using Evanescent Field Coupling Jae-yoon Jeong, 2001 In this work we present experimental results on tenability of fiber Bragg grating incorporating evanescent field coupling Evanescent field is the exponentially decaying part of an optical mode formed in a waveguide A section of fiber with a Bragg grating written in it is side polished until most of the cladding is removed. The evanescent field is modified by applying different index matching oil and by placing a dielectric material on the polished area of the fiber A tunability as much as 5 nm was demonstrated as the applied index matching oil varied from n 1 40 to n 1 45 Polarization dependent behavior of the device was also measured and it was found out that the polarization component that is perpendicular to the polished surface experiences severe loss A prototype tunable grating device incorporating a MEMS structure is also discussed Analysis and Design of Integrated, Etched Grating Dense Wavelength Division Multiplexers Jingyun Zhang, 2001 Physics and Simulation of Optoelectronic Devices ,1992 **International Conference on Education in Optics** ,1995 Photonic Materials, Devices, and Applications II Ali Serpengüzel, Gonçal Badenes, Giancarlo C.
