**Medical Laboratory Manual for Tropical Countries** Monica Cheesbrough, 1985      Medical Laboratory Manual for Tropical Countries Mónica Cheesbrough, 1984      **Medical Laboratory Manual for Tropical Countries** Monica Cheesbrough, 1981      Field Trials of Health Interventions Peter G. Smith, Richard H. Morrow, David A. Ross, 2015-06-25 This is an open access title available under the terms of a CC BY NC 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Before new interventions are released into disease control programmes it is essential that they are carefully evaluated in field trials. These may be complex and expensive undertakings requiring the follow up of hundreds or thousands of individuals often for long periods. Descriptions of the detailed procedures and methods used in the trials that have been conducted have rarely been published. A consequence of this individuals planning such trials have few guidelines available and little access to knowledge accumulated previously other than their own. In this manual practical issues in trial design and conduct are discussed fully and in sufficient detail that Field Trials of Health Interventions may be used as a toolbox by field investigators. It has been compiled by an international group of over 30 authors with direct experience in the design, conduct and analysis of field trials in low and middle income countries and is based on their accumulated knowledge and experience. Available as an open access book via Oxford Medicine Online, this new edition is a comprehensive revision incorporating the new developments that have taken place in recent years with respect to trials including seven new chapters on subjects ranging from trial governance and preliminary studies to pilot testing.

**Organization and Practice in Tuberculosis Bacteriology** C. H. Collins, J. M. Grange, M. D. Yates, 2014-05-19 Organization and Practice in Tuberculosis Bacteriology focuses on the organization and technical methods of tuberculosis bacteriology. This book discusses the mycobacteria and mycobacterial disease and role and scope of the tuberculosis laboratory in human and veterinary medicine and epidemiology. The organization of tuberculosis laboratory services, collection, preservation and transport of specimens and examination of direct smears are also elaborated. This text likewise covers the decontamination of specimens, inoculation of culture media and identification of species and variants of tubercle bacilli. Other topics include the drug sensitivity tests, animal inoculation and assay tests, problems faced in the therapy of tuberculosis and lipid chromatography. This publication is suitable for biologists, medical practitioners and clinicians concerned with tuberculosis bacteriology.
