Daniel Robertz, 2014-10-13 Investigating the correspondence between systems of partial differential equations and their analytic solutions using a formal approach this monograph presents algorithms to determine the set of analytic solutions of such a system and conversely to find differential equations whose set of solutions coincides with a given parametrized set of analytic functions After giving a detailed introduction to Janet bases and Thomas decomposition the problem of finding an

implicit description of certain sets of analytic functions in terms of differential equations is addressed Effective methods of varying generality are developed to solve the differential elimination problems that arise in this context In particular it is demonstrated how the symbolic solution of partial differential equations profits from the study of the implicitization problem For instance certain families of exact solutions of the Navier Stokes equations can be computed Notices of the American Mathematical Society American Mathematical Society,1984 Contains articles of significant interest to mathematicians including reports on current mathematical research Subject Guide to Books in Print ,2001 Xerox College Library Book Program ,1970 **Mathematics Magazine** ,1977 **First Course in Algebra and Number Theory** Edwin Weiss,1971 First Course in Algebra and Number Theory *Scientific and Technical Books and Serials in Print* ,1989 *Combined Membership List of the American Mathematical Society and the Mathematical Association of America* American Mathematical Society,1974 Children's Books in Print, 2007 ,2006 **Combined Membership List** American Mathematical Society,1973 Lists for 19 include the Mathematical Association of America and 1955 also the Society for Industrial and Applied Mathematics *Complete Catalog of Books in All Fields* Dover Publications, Inc,1997 Books in Print ,1994 Statistics Catalog 2005 Neil Thomson,2004-09 **Journal of Economic Literature** ,1983
