

## Protection of the environment

### Environmental note

DaimlerChrysler's declared policy is one of integrated environmental protection, starting at the very outset and encompassing all its management decisions at the earliest stage for the reason that which could arise from production processes or the products themselves.

The objectives are for the nature measures which form the basis of our business on the planet to be used sparingly and in a manner which takes the requirements of both nature and humanity into account.

You too can help to protect the environment by operating your Mercedes-Benz in an environmentally responsible manner.

Fuel consumption and the rate of engine wear, brake and tyre wear depend on the following two factors:

- The operating conditions of your vehicle
- Your personal driving style

You can influence both of these factors

Therefore, please observe the following

#### Operating conditions

- Avoid driving short distances.
- Make sure that tyres are inflated to the correct pressure.
- Do not carry any unnecessary weight.
- Remove roof racks when they are not being used.
- Monitor fuel consumption.
- A regularly serviced vehicle will contribute to environmental protection. You should therefore adhere to the service intervals stipulated by the Active Service System (DISTRIC PLUS).
- In the winter, start the engine.
- Always leave parked with handbrake set at a qualified specialist workshop, e.g. a Mercedes-Benz Service Centre.

#### Personal driving style

- Do not depress the accelerator pedal when starting the engine.
- Do not warm the engine up while the vehicle is stationary.
- Anticipate road and traffic conditions while driving and maintain sufficient distance from the vehicle in front.
- Avoid frequent and sudden acceleration.
- Change gear in good time, using each gear only up to 80% of its maximum engine speed.
- Switch off the engine during periods spent in stationary traffic.
