Sharon Pickering, Julie Ham

Memorandum Grade 10 Economics Paper 2 June 2014:

The Routledge Handbook on Crime and International Migration Sharon Pickering, Julie Ham, 2017-07-14 The Routledge Handbook on Crime and International Migration is concerned with the various relationships between migration crime and victimization that have informed a wide criminological scholarship often driven by some of the original lines of inquiry of the Chicago School. Historically migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity often in highly problematic ways. However in the contemporary period this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants. The Routledge Handbook on Crime and International Migration is also concerned with the theoretical, empirical and policy knots found in the relationship between regular and irregular migration, offending and victimization, the processes and impact of criminalization and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders. The Handbook is focused on the migratory fault lines between the Global North and Global South which have produced new or accelerated sites of state control, constructed irregular migration as a crime and security problem and mobilized ideological and coercive powers usually reserved for criminal or military threats. Offering a strong international focus and comprehensive coverage of a wide range of border, criminal justice and migration related issues, this book is an important contribution to criminology and migration studies and will be essential reading for academics, students and practitioners interested in this field.

Calling the Shots Daniel P. Gitterman, 2017-02-14 Modern presidents are CEOs with broad powers over the federal government. The United States Constitution lays out three hypothetically equal branches of government: the executive, the legislative and the judicial, but over the years the president as head of the executive branch has emerged as the usually dominant political and administrative force at the federal level. In fact, Daniel Gitterman tells us, the president is effectively the CEO of an enormous federal bureaucracy. Using the unique legal authority delegated by thousands of laws, the ability to issue executive orders and the capacity to shape how federal agencies write and enforce rules, the president calls the shots as to how the government is run on a daily basis. Modern presidents have, for example, used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers. Presidents and their staffs use specific tools, including executive orders and memoranda to agency heads, as instruments of control and influence over the government and the private sector. For more than a century they have used these tools without violating the separation of powers. *Calling the Shots* demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president's political and policymaking arsenal.

The Invisible Hand of Power Anton N. Oleinik, 2015-10-06 This is an innovative study of the techniques of domination based on financial markets, judicial systems, academia and international relations across North America and post-Soviet Russia. Ultimately, Oleinik seeks

to provide an alternative to mainstream economic analyses of power *Class and Group Actions in Arbitration* Bernard Hanotiau, Eric A. Schwartz, 2016-09-23 Several decades ago a typical arbitration would involve one claimant against one respondent Over the years more and more cases involve several claimants against several respondents Today one third of all international ICC arbitrations seem to involve multiparty cases multi contract cases involving multiple contracts multiple parties The evolution has continued and the debate today is whether it would be possible for a class of people in the same situation or a group of citizens having the same interest to start one single arbitration procedure as a group or as a class This publication examines the complex issues involved in class or group arbitration on a comparative law basis Is there a place for such proceedings within the framework of the arbitration process Class action procedures as developed in the United States court system and more recently in Canada are almost nonexistent in Europe The European Commission has advocated collective redress as an important means of access to justice but class actions have found little enthusiasm in the Member States The book highlights the lessons which have been learned from the experience of cases in the US and in Europe What does the future hold for class collective and mass arbitrations Are they a marginal phenomenon or has their potential yet to be realized What are possible solutions to the issues that have been encountered Can we expect to see more of such arbitrations in the future Written by arbitrators academics and practitioners this Dossier will provide the answers to these questions and many more Consumer Involvement in Private EU Competition Law Enforcement Maria

Ioannidou, 2015-09-03 Despite the growing importance of consumer welfare in EU competition law debates there remains a significant disconnect between rhetoric and reality as consumers and their interests still play only an ancillary role in this area of law Consumer Involvement in Private EU Competition Law Enforcement is the first monograph to exclusively address this highly topical and much debated subject providing a timely and wide ranging examination of the need for more active consumer participation in competition law Written by an expert in the field it sets out a comprehensive framework of policy implications and arguments for greater involvement positioning the debate in the context of a broader EU law perspective It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment Finally the book identifies key institutional and political obstacles to the adoption of effective measures and suggests alternative routes to enhance the role of consumers in private competition law enforcement The book's innovative approach combining normative analysis and practical solutions make it invaluable for academics policy makers and practitioners in the field
