some sort of seasoning broth and finally as a third component there will be soup additions so called toppings The finished soup is usually named after the base broth that is used Basically to differentiate here are Miso Tonkutsu Shoyu and Shio Miso soups are known for their strong fermented soy paste taste Tonkutsu is the meat or bone broth from Japan Shoyu ramen are mostly based on the flavor of soy sauce and Shio is the seafood soup which tastes salty and is made from fish and seafood In reality every ramen chef swears by their own secret recipe Become one of those chefs yourself You just need a certain fondness of experimenting Take the recipes in this book and use them as inspiration to begin your own ramen journey
