Henry Hunter,2015-06-16 Excerpt from Dock and Lock Machinery A Technical Manual It is a truism perhaps a platitude to assert that the first duty of one who essays the art of public speaking and thereby invites others to yield attention to his words is to interest his audience as apart from such interest the speaker is not likely either to engage the mind or to convince the understanding of a single member of that audience It is equally true that the initial duty of one who undertakes any burden of authorship even in so unpretending a manner as in this monograph and who thus appeals for the suffrages of a particular and critical class of readers is to make his work readable is to make it of such sort that it will not only accord with the dictum of Aristotle that any written composition ought to be easily read but that it may be perused without boredom or exhaustion of interest One who writes and hopes that others will read has a more difficult position to maintain than one who speaks and invites others to hear The latter can and if he has in him a vein of humour or a grain of sense does illumine a dull theme and give colour to a grey monochrome by the introduction of narrative even though the narrative may not be very relevant or of allusion Such aid is forbidden to a technical writer of the present day by an inane though potent authority entitled Convention Convention seeks to drag down to the level of its own inanity all the features and departments of modern life and literature including even such literature as appears in the guise of Engineering publications This was not always the case Some of the treatises and reports which were issued from the studies or the offices of the fathers of modern Engineering were full of interest and even of romance while in particular cases the quaintness of their restrained humour was irresistible About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
