

## Homework Questions from 1.1

The following questions are all problems using the normal distribution. Before doing any:

Step 1: State the hypothesis normality

Step 2: State all parameters and the test statistic normality and the normality test

Step 3: Calculate Step 4: Do Step 5: Do

Now we have all parameters for the test for the hypothesis.

Step:

The hypothesis is normality. The normality test is the test for the normality of the population. The hypothesis is normality. The normality test is the test for the normality of the population. The hypothesis is normality. The normality test is the test for the normality of the population.

The hypothesis is normality. The normality test is the test for the normality of the population. The hypothesis is normality. The normality test is the test for the normality of the population.

## Example

All parameters calculated from the hypothesis are the same. Normality

The hypothesis is normality. The normality test is the test for the normality of the population.

The hypothesis is normality. The normality test is the test for the normality of the population.
