**Ludopolitics** Liam Mitchell, 2018-12-14 What can videogames tell us about the politics of contemporary technoculture and how are designers and players responding to its impositions To what extent do the technical features of videogames index our assumptions about what exists and what is denied that status And how can we use games to identify and shift those assumptions without ever putting down the controller Ludopolitics responds to these questions with a critique of one of the defining features of modern technology the fantasy of control Videogames promise players the opportunity to map and master worlds offering closed systems that are perfect in principle if not in practice In their numerical rule bound and goal oriented form they express assumptions about both the technological world and the world as such More importantly they can help us identify these assumptions and challenge them Games like Spec Ops The Line Braid Undertale and Bastion as well as play practices like speedrunning theorycrafting and myth making provide an aesthetic means of mounting a political critique of the pursuit and valorization of technological control Paratextualizing Games Benjamin Beil, Gundolf S.
