**Human Interaction, Emerging Technologies and Future Applications II** Tareq Ahram, Redha Taiar, Vincent Gremaux-Bader, Kamiar Aminian, 2020-04-02 This book reports on research and developments in human technology interaction. A special emphasis is given to human computer interaction and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication and education among others. The human aspects are analyzed in detail. Timely studies on human centered design, wearable technologies, social and affective computing, augmented virtual and mixed reality, simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security and infrastructure are also critically examined, thus offering a timely, scientifically grounded but also professionally oriented snapshot of the current state of the field. The book is based on contributions presented at the 2nd International Conference on Human Interaction and Emerging Technologies Future Applications (IHET AI 2020) held on April 23-25 in Lausanne, Switzerland. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems. *Hearings on National Defense Authorization Act for Fiscal Year 2002--H.R. 2586 and Oversight of Previously Authorized Programs, Before the Committee on Armed Services, House of Representatives, One Hundred Seventh Congress, First Session* United States.
