Naval Studies Board 40th Anniversary National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, 2014-12-22 Forty years ago the Naval Studies Board was created at the request of then Chief of Naval Operations Admiral Elmo R Zumwalt Jr. As stated in his request to the National Academy of Sciences he thought it important for the Navy to have an outside resource to which it could turn for independent and outside counsel on any area of its responsibilities involving the interplay of scientific and technical matters with other national issues. Admiral Zumwalt together with Under Secretary of the Navy Honorable David S. Potter and President of the National Academy of Sciences Dr. Philip Handler recognized the importance of not only continuing but also focusing and strengthening the relationship that had existed between the National Academy of Sciences and the Department of the Navy since the Academy's creation in 1863. To commemorate this special anniversary Naval Studies Board 40th Anniversary provides an overview of the history, mission, and accomplishments of the Board. In the coming years the Naval Studies Board will continue to serve as a source of independent long range scientific and technical planning advice for the nation's naval forces. It will also work to ensure that the relationships between the operational science, engineering, and technical communities remain as strong and productive as ever to ensure that progress continues in areas most critical to meeting future naval forces needs. **Naval Studies Board**

40th Anniversary, 2014 Naval Forces' Capability for Theater Missile Defense National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee for Naval Forces' Capability for Theater Missile Defense, 2001-05-01 At the request of the Chief of Naval Operations the National Research Council under the auspices of the Naval Studies Board established a committee to assess the Department of the Navy's current and future naval theater missile defense TMD capabilities. The Committee for Naval Forces Capability for Theater Missile Defense first convened in April 2000 and met approximately 2 days a month for 8 months. This report is based on the information presented to the committee during that period and on the committee members' accumulated experience and expertise in military operations systems and technologies. **Distributed Remote Sensing for Naval Undersea Warfare**

National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on Distributed Remote Sensing for Naval Undersea Warfare, 2007-07-12 The widespread availability of quiet diesel electric submarines and inexpensive mines is posing a growing threat to global access by the U.S. Navy. In response the Navy has expanded its undersea warfare efforts and put particular emphasis on the potential for new distributed remote sensing (DRS) approaches. To assist with this effort the former Chief of Naval Operations requested the NRC to conduct an assessment of DRS for naval undersea warfare. This report provides a clear near term path by which useful DRS systems can be applied rapidly to pressing naval USW problems and by which ongoing science and technology efforts can be directed toward the most useful options. The report contains information as described in 5 U.S.C. 552 b and therefore could not be released to the public in its entirety. The public version consists of

2000 Assessment of the Office of Naval Research's Marine Corps Science and Technology Program National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Naval Studies Board, Committee for the Review of ONR's Marine Corps Science and Technology Program, 2000-11-14 This review of the Science and Technology S T program of the Office of Naval Research's ONR's Expeditionary Warfare Operations Technology Division Code 353 comes at a time of considerable change in the Marine Corps and in ONR which are currently in the midst of significant transitions The Marine Corps is making plans to equip and train for engaging in a new style of warfare known as Operational Maneuver From the Sea OMFTS and for performing a wide variety of missions in urban settings ranging from humanitarian assistance to combat and mixes of these suggested by the term three block war During 1999 ONR assumed management of that portion of the Marine Corps S T program that had not been assigned several years earlier to the Marine Corps Warfighting Laboratory MCWL In 2002 control of most of ONR's advanced development funding 6.3 and of much of its exploratory development funding 6.2 will move from ONR's line divisions of which Code 353 is one of many to 12 new program offices each dedicated to demonstrating technologies for future naval capabilities FNCs Given these changes it is not surprising that some of the projects inherited recently by ONR and assessed by the Committee for the Review of ONR's Marine Corps Science and Technology Program under the auspices of the Naval Studies Board of the National Research Council differed from the customary ONR project and were more akin to preacquisition or acquisition support than to S T It is also not surprising that Code 353 could not articulate its plans for future investments clearly and concisely given the current uncertainty about the content of and funding level for FNCs The Marine Corps S T program supports the five imperatives for technology advancement that the Marine Corps Combat Development Command MCCDC has identified as prerequisites for the transition to OMFTS maneuver firepower logistics training and education and command and control The committee supports investment in these areas and in the report's discussions and recommendations follows the five imperatives

The Role of Naval Forces in the Global War on Terror National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on the Role of Naval Forces in the Global War on Terror, 2007-07-12 The growth of the terrorism threat to the nation's security has created significant strategic challenges for U.S. armed forces in fighting this global war on terrorism GWOT For the Navy the challenges have centered on developing maritime capabilities to prosecute the GWOT as far forward as possible To assist the Navy's planning in this area the former Chief of Naval Operations requested the NRC to conduct an assessment of the adequacy of and prospects for improving the role of Naval Forces in the GWOT The study developed a defense in depth framework as the organizing principle for the report The report contains information as described in 5 U.S.C. 552 b and therefore could not be released to the public in its entirety The public version consists of an executive summary that presents an assessment of the transformation of naval forces for addressing the GWOT a brief description of the defense in depth

framework and a list of findings and major recommendations

2003 Assessment of the Office of Naval Research's Marine Corps Science and Technology Program National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee for the Review of ONR's Marine Corps Science and Technology Program, 2004-04-01 The Office of Naval Research ONR funds research across a broad range of scientific and engineering disciplines in support of the Navy and Marine Corps To ensure that its investments are serving those ends and are of high quality ONR requires each of its departments to undergo annual review Since 1999 the Naval Expeditionary Warfare Department of ONR has requested that the NRC conduct these reviews This report presents the results of the second review of the Marine Corps Science and Technology program The first review was conducted in 2000 The 2003 assessment examines the overall Marine Corps S T program the littoral combat future naval capability the core thrusts of the program and basic research activities

Naval Mine Warfare National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee for Mine Warfare Assessment, 2001-09-19 Sea mines have been important in naval warfare throughout history and continue to be so today They have caused major damage to naval forces slowed or stopped naval actions and commercial shipping and forced the alteration of strategic and tactical plans The threat posed by sea mines continues and is increasing in today s world of inexpensive advanced electronics nanotechnology and multiple potential enemies some of which are difficult to identify This report assesses the Department of the Navy s capabilities for conducting naval mining and countermining sea operations

2002 Assessment of the Office of Naval Research's Air and Surface Weapons Technology Program National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee for the Review of ONR's Air and Surface Weapons Technology Program, 2002-12-31 The Office of Naval Research ONR contracted with the Naval Studies Board NSB of the National Research Council NRC to establish a committee to review ONR s Air and Surface Weapons Technology ASWT program The committee convened on May 14 and 15 2002 and reviewed more than 20 science and technology S T efforts that were presented as constituting the ASWT program The committee then met separately on May 16 2002 to formulate its findings and recommendations This report represents the consensus views of the committee and is based on the information presented prior to and at the review as well as on the committee members accumulated experience and expertise in military operations systems and technologies

Sea Basing National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on Sea Basing: Ensuring Joint Force Access from the

Sea,2005-08-14 The availability of land bases from which to launch and maintain military diplomatic and humanitarian relief operations is becoming increasingly uncertain because of physical or political constraints The ability to operate from a sea base therefore is likely to become more and more important The Defense Science Board recently concluded that Sea Basing will be a critical future joint military capability and that DOD should proceed to develop such capability Following the DSB report the Navy requested that the National Research Council NRC convene a workshop to assess the science and technology base both inside and outside the Navy for developing Sea Basing and to identify R ship and aircraft technology available to make Sea Basing work and issues involved in creating the sea base as a joint system of systems
