The Intimate Life of Computers Reem Hilu, 2024-11-19 A feminist perspective on the early history of personal computing revealing how computers were integrated into the most intimate aspects of family life The Intimate Life of Computers shows how the widespread introduction of home computers in the 1980s was purposefully geared toward helping sustain heteronormative middle class families by shaping relationships between users Moving beyond the story of male dominated computer culture this book emphasizes the neglected history of the influence of women's culture and feminist critique on the development of personal computing despite women's underrepresentation in the industry Proposing the notion of companionate computing Reem Hilu reimagines the spread of computers into American homes as the history of an interpersonal romantic and familial medium She details the integration of computing into family relationships from helping couples have better sex and offering thoughtful simulations of masculine seduction to animating cute robot companions and giving voice to dolls that could talk to lonely children underscoring how these computer applications directly responded to the companionate needs of their users as a way to ease growing pressures on home life The Intimate Life of Computers is a vital contribution to feminist media history highlighting how the emergence of personal computing dovetailed with changing gender roles and other social and cultural shifts Eschewing the emphasis on technologies and institutions typically foregrounded in personal computer histories Hilu uncovers the surprising ways that domesticity and family life guided the earlier stages of our all pervasive digital culture

Exploring Imaginary Worlds Mark Wolf, 2020-10-08 From The Brothers Karamazov to Star Trek to Twin Peaks, this collection explores a variety of different imaginary worlds, both historic and contemporary. Featuring contributions from an interdisciplinary and international group of scholars, each essay looks at a particular imaginary world in depth and world-building issues associated with that world. Together, the essays explore the relationship between the worlds and the media in which they appear as they examine imaginary worlds in literature, television, film, computer games, and theatre, with many existing across multiple media simultaneously. The book argues that the media incarnation of a world affects world structure and poses unique obstacles to the act of world building. The worlds discussed include Nazar Barsetshire, Skotopogonievsk, the Vorkosigan Universe, Grover's Corners, Gormenghast, Collinsport, Daventry, Dune, the Death Gate Cycle universe, Twin Peaks, and the Star Trek galaxy. A follow-up to Mark J. P. Wolf's field-defining book *Building Imaginary Worlds*, this collection will be of critical interest to students and scholars of popular culture, subcreation studies, transmedia studies, literature, and beyond.
