The Hyperuniverse Project and Maximality Carolin Antos, Sy-David Friedman, Radek Honzik, Claudio Ternullo, 2018-01-30 This collection documents the work of the Hyperuniverse Project which is a new approach to set theoretic truth based on justifiable principles and which leads to the resolution of many questions independent from ZFC The contributions give an overview of the program illustrate its mathematical content and implications and also discuss its philosophical assumptions It will thus be of wide appeal among mathematicians and philosophers with an interest in the foundations of set theory The Hyperuniverse Project was supported by the John Templeton Foundation from January 2013 until September 2015

Victory Undone Carter Address, Malcolm McConnell, 2014-10-20 Here is a dramatic first person account of how the United States won the war in Iraq only to see the peace lost by an unengaged administration with Iraqis terrorized and the new caliph of ISIS promising I'll see you in New York Military contractor Carter Address was the ultimate boots on the ground civilian in Iraq While reporters aid workers diplomats and even U S soldiers were often cut off from the ground truth in Iraq by the blast walls protecting the Green Zone and our bases Address was in the thick of things driving through insurgent infested territory negotiating with hostile tribes and witnessing the transformation of Iraq from chaos and violence to a stable multi ethnic multi sectarian democracy that needed only minimal American support to defend itself support however that thanks to the Obama administration was not forthcoming A page turner of a story but also an incredibly important account of what actually happened in the Iraq War and afterwards Victory Undone is a book every American needs to read

Algebraic Structures of Neutrosophic Triplets, Neutrosophic Duplets, or Neutrosophic Multisets Florentin Smarandache, Xiaohong Zhang, Mumtaz Ali, 2019-04-04

Neutrosophy 1995 is a new branch of philosophy that studies triads of the form where is an entity i e element concept idea theory logical proposition etc is the opposite of while is the neutral or indeterminate between them i e neither nor Based on neutrosophy the neutrosophic triplets were founded which have a similar form $x \text{ neut } x \text{ anti } x$ that satisfy several axioms for each element x in a given set This collective book presents original research papers by many neutrosophic researchers from around the world that report on the state of the art and recent advancements of neutrosophic triplets neutrosophic duplets neutrosophic multisets and their algebraic structures that have been defined recently in 2016 but have gained interest from world researchers Connections between classical algebraic structures and neutrosophic triplet duplet multiset structures are also studied And numerous neutrosophic applications in various fields such as multi criteria decision making image segmentation medical diagnosis fault diagnosis clustering data neutrosophic probability human resource management strategic planning forecasting model multi granulation supplier selection problems typhoon disaster evaluation skin lesion detection mining algorithm for big data analysis etc

Machine Learning for Data Science Handbook Lior Rokach, Oded Maimon, Erez Shmueli, 2023-08-17 This book is a major update to the very successful first and second editions 2005 and 2010 of Data Mining and Knowledge Discovery Handbook Since the last edition this field has continued to evolve and to gain popularity Existing methods are constantly being improved and new methods applications and aspects are introduced The new title of this handbook and its content reflect these changes thoroughly Some existing chapters have been brought up to date In addition to major revision of the existing chapters the new edition includes totally new topics such as deep learning explainable AI human factors and social issues and advanced methods for big data The significant enhancement to the content reflects the growth in importance of data science The third edition is also a timely opportunity to incorporate many other changes based on peers and students feedback This comprehensive handbook also presents a coherent and unified repository of data science major concepts theories methods trends challenges and applications It covers all the crucial important machine learning methods used in data science Today s accessibility and abundance of data make data science matters of considerable importance and necessity Given the field s recent growth it s not surprising that researchers and practitioners now have a wide range of methods and tools at their disposal While statistics is fundamental for data science methods originated from artificial intelligence particularly machine learning are also playing a significant role This handbook

aims to serve as the main reference for researchers in the fields of information technology e Commerce information retrieval data science machine learning data mining databases and statistics as well as advanced level students studying computer science or electrical engineering Practitioners working within these related fields and data scientists will also want to purchase this handbook as a reference

Article Fundamental Homomorphism Theorems for Neutrosophic Extended Triplet Groups Mehmet Çelik ,Moges Mekonnen Shalla,Necati Olgun, In classical group theory homomorphism and isomorphism are significant to study the relation between two algebraic systems Through this article we propose neutro homomorphism and neutro isomorphism for the neutrosophic extended triplet group NETG which plays a significant role in the theory of neutrosophic triplet algebraic structures Then we define neutro monomorphism neutro epimorphism and neutro automorphism We give and prove some theorems related to these structures Furthermore the Fundamental homomorphism theorem for the NETG is given and some special cases are discussed First and second neutro isomorphism theorems are stated Finally by applying homomorphism theorems to neutrosophic extended triplet algebraic structures we have examined how closely different systems are related

Digital Childhoods Susan J. Danby,Marilyn Fleer,Christina Davidson,Maria Hatzigianni,2018-04-03 This book highlights the multiple ways that digital technologies are being used in everyday contexts at home and school in communities and across diverse activities from play to web searching to talking to family members who are far away The book helps readers understand the diverse practices employed as children make connections with digital technologies in their everyday experiences In addition the book employs a framework that helps readers easily access major themes at a glance and also showcases the diversity of ideas and theorisations that underpin the respective chapters In this way each chapter stands alone in making a specific contribution and at the same time makes explicit its connections to the broader themes of digital technologies in children s everyday lives The concept of digital childhood presented here goes beyond a sociological reading of the everyday lives of children and their families and reflects the various contexts in which children engage such as preschools and childcare centres
