Mathematics Memo For Grade 9 November 2014:

Education and the Commercial Mindset Samuel E. Abrams, 2016-04-25 America's commitment to public schooling once seemed unshakable. But today the movement to privatize K-12 education is stronger than ever. Samuel E. Abrams examines the rise of market forces in public education and reveals how a commercial mindset has taken over. An outstanding book. Carol Burris, Washington Post. Given the near complete absence of public information and debate about the stealth effort to privatize public schools, this is the right time for the appearance of this book. Samuel E. Abrams, a veteran teacher and administrator, has written an elegant analysis of the workings of market forces in education. Diane Ravitch, New York Review of Books. *Education and the Commercial Mindset* provides the most detailed and comprehensive analysis of the school privatization movement to date. Students of American education will learn a great deal from it. Leo Casey, Dissent.

The Best Class You Never Taught Alexis Wiggins, 2017-09-27 The best classes have a life of their own, powered by student-led conversations that explore texts, ideas, and essential questions. In these classes, the teacher's role shifts from star player to observer and coach as the students think critically, work collaboratively, participate fully, behave ethically, ask and answer high-level questions, support their ideas with evidence, and evaluate and assess their own work. The Spider Web Discussion is a simple technique that puts this kind of class within every teacher's reach. The name comes from the weblike diagram the observer makes to record interactions as students actively participate in the discussion, lead and support one another's learning, and build community. It's proven to work across all subject areas and with all ages, and you only need a little know-how, a rubric, and paper and pencil to get started. As students practice Spider Web Discussion, they become stronger communicators, more empathetic teammates, better problem solvers, and more independent learners—college and career-ready skills that serve them well in the classroom and beyond. Educator Alexis Wiggins provides a step-by-step guide for the implementation of Spider Web Discussion, covering everything from introducing the technique to creating rubrics for discussion, self-assessment, to the nuts and bolts of charting the conversations and using the data collected for formative assessment. She also shares troubleshooting tips, ideas for assessment and group grading, and the experiences of real teachers and students who use the technique to develop and share content knowledge in a way that's both revolutionary and truly inspiring.
