Contributing Factors to TIMSS 2011 Eighth Graders' Science Achievement: A Comparison between Malaysia and Singapore Lay Yoon Fah, Ng Khar Thoe, Suma Parahakaran, 2020-05-03 Trends in International Mathematics and Science Study TIMSS is one of the projects of the International Association for the Evaluation of Educational Achievement IEA located at Amsterdam The Netherlands and Hamburg Germany IEA is an independent cooperative of national educational research institutions and governmental research agencies dedicated to improving education TIMSS is conducted regularly for every four years to assess students achievement in science and mathematics at both the fourth and eighth grades The project is dedicated to providing participating countries with information to improve teaching and learning in science and mathematics This book is written especially for the interest of undergraduate students postgraduate students and educators of science education who wish to know more about the contributing factors to Grade 8 students science achievement in TIMSS This book is also resourceful for individuals who are involved directly or indirectly in the administration and implementation of TIMSS at the national state district and school levels This book consists of seven chapters The first chapter gives a brief introduction to TIMSS which includes the TIMSS curriculum model and TIMSS science assessment frameworks The subsequent chapters compare the contribution of various factors i.e. home environment support school resources school climate teacher preparation and classroom instructions on Malaysian and Singaporean Grade 8 students science achievement in TIMSS 2011 Last but not least recommendations on ways to improve Malaysian Grade 8 students science achievement in the forthcoming TIMSS are suggested based on the experiences of the Singaporean education system

Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children

Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide Handbook of Response to Intervention Shane R. Jimerson,Matthew K. Burns,Amanda M.

VanDerHeyden,2015-09-21 The Second Edition of this essential handbook provides a comprehensive updated overview of the science that informs best practices for the implementation of response to intervention RTI processes within Multi Tiered Systems of Support MTSS to facilitate the academic success of all students The volume includes insights from leading scholars and scientist practitioners to provide a highly usable guide to the essentials of RTI assessment and identification as well as research based interventions for improving students reading writing oral and math skills New and revised chapters explore crucial issues define key concepts identify topics warranting further study and address real world questions regarding implementation Key topics include Scientific foundations of RTI Psychometric measurement within RTI RTI and social behavior skills The role of consultation in RTI Monitoring response to supplemental services Using technology to facilitate RTI RTI and transition planning Lessons learned from RTI programs around the country The Second Edition of the Handbook of Response to Intervention is an essential resource for researchers graduate students and professionals scientist practitioners in child and school psychology special and general education social work and counseling and educational policy and politics *Numerical Development - From cognitive functions to neural underpinnings* Korbinian Moeller,Elise

Klein,Klaus F Willmes - von Hinckeldey,Karin Kucian,2015-02-24 Living at the beginning of the 21st century requires being numerate because numerical abilities are not only essential for life prospects of individuals but also for economic interests of post industrial knowledge societies Thus numerical development is at the core of both individual as well as societal interests There is the notion that we are already born with a very basic ability to deal with small numerosities Yet this often called number sense seems to be very restricted approximate and driven by perceptual constraints During our numerical development in formal e g school but also informal contexts e g family street we acquire culturally developed abstract symbol systems to represent exact numerosities in particular number words and Arabic digits refining our numerical capabilities In recent years numerical development has gained increasing research interest documented in a growing number of behavioural neuro scientific educational cross cultural and neuropsychological studies addressing this issue Additionally our understanding of how numerical competencies develop has also benefitted considerably from the advent of different neuro imaging techniques allowing for an evaluation of developmental changes in the human brain In sum we are now starting to

put together a more and more coherent picture of how numerical competencies develop and how this development is associated with neural changes as well. In the end this knowledge might also lead to a better understanding of the reasons for atypical numerical development which often has grievous consequences for those who suffer from developmental dyscalculia or mathematics learning disabilities. Therefore this Research Topic deals with all aspects of numerical development findings from behavioural performance to underlying neural substrates from cross sectional to longitudinal evaluations from healthy to clinical populations. To this end we included empirical contributions using different experimental methodologies but also theoretical contributions, review articles or opinion papers.

Second International Handbook on Globalisation, Education and Policy Research Joseph Zajda, 2015-01-06
This handbook presents a global overview of developments in education and policy change during the last decade. It provides an accessible practical and comparative source of current research that examines the intersecting and diverse discourses of this important issue. Divided into two parts, the handbook first examines globalisation and education policy reforms including coverage of main trends as well as specific policy issues such as gender equity, minorities and human rights. Next, the handbook offers a comparative perspective that evaluates the ambivalent and problematic relationship between globalisation, the state and education reforms globally. It features coverage on curricula issues and education reforms in schools around the world as well as the curriculum in the global culture. Now more than ever, there is a need to understand and analyse both the intended and the unintended effects of globalisation on economic competitiveness, educational systems, the state and relevant policy changes, all as they affect individuals, the higher education sector, schools, policy makers and powerful corporate organisations across the globe. By examining some of the major education policy issues, particularly in the light of recent shifts in education and policy research, this handbook offers readers a comprehensive picture of the impact of globalisation on education policy and reforms. It will serve as a vital sourcebook of ideas for researchers, practitioners and policy makers in education.

Restoring Opportunity Greg J. Duncan, Richard J. Murnane, 2014-01-01
In this landmark volume, Greg J. Duncan and Richard J. Murnane lay out a meticulously researched case showing how, in a time of spiraling inequality, strategically targeted interventions and supports can help schools significantly improve the life chances of low-income children. The authors offer a brilliant synthesis

of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation s future depends Copublished with the Russell Sage Foundation **Homeschooling High School** Shirley Erwee,2014-08-28

Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers They need information and answers to their questions And with the current educational and unemployment problems in South Africa young people need clear direction and guidance to help them achieve their goals In addition to exploring the popular ways to gaining a recognised matric certificate outside the formal school system Homeschooling High School also challenges readers to rethink their values particularly the value they place on certification and to consider some unconventional or alternative paths to success In a clearly presented format the book includes advice on legal matters identifying appropriate courses sourcing study material tips on entrepreneurship financing tertiary studies and the testimonies of successful homeschooled graduates Homeschooling High School is a comprehensive guide to plotting a path through high school and beyond
