Memorandum Of Maths Literacy September

Romuald Normand, Jean-Louis Derouet

Memorandum Of Maths Literacy September:

Proceedings of the Sixth Australian Coal Preparation Conference, Mackay, 6-9 September, 1993 Jon J. Davis, 1993

National Skills Strategy: Oral and written evidence Great Britain. Parliament. House of Commons. Education and Skills Committee, 2005 Incorporating HCP 197 i xiii session 2003 04 **The Department for Children, Schools and Families and the Children's Plan** Great Britain: Parliament: House of Commons: Children, Schools and Families Committee, 2008 This second report entitled The Department for Children Schools and Families and the Children s Plan HCP 213 session 2007 08 ISBN 9780215514691 from the Children Schools and Families Committee examines the creation of the new Department for Children Schools and Families The Department has sole responsibility for early years education and the schooling of children between 5 and 13 but in other areas such as education for 14 19 year olds it operates jointly with other Government departments in particular the Department for Innovation Universities and Skills The Committee welcomes the Departmental focus on children but expresses some reservations in regard of joint responsibility which it sees as leading to a lack of clarity in regard of responsibility and a dilution in decision making The Committee believes clarity on which Department has specific responsibility is important particularly with the introduction of the new Diploma system for 14 19 year olds Also the Departments Children s Plan does not at present have a timetable of action or a clear set of priorities and that the Department needs to be explicit on how it intends to drive improvements in services for children and families In total the Committee has set out 14 conclusions and recommendations covering the new Department the Children s Plan Public Service Agreements schools funding efficiency and productivity 2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Neuroscience in Education Sergio Della Sala, Mike Anderson, 2012-04-05 In the past ten years there has been growing

interest in applying our knowledge of the human brain to the field of education including reading learning language and mathematics This has resulted in the development of a number of new practices in education some good some bad and some just crazy Hence we have had theories suggesting that listening to Mozart can boost intelligence foot massages can help unruly pupils fish oil can boost brain power even the idea that breathing through your left nostril can enhance creativity Sadly there is a gap between what neuroscientists or cognitive psychologists know about brain mind functions and the supposedly scientific theory underlying the practices used daily in our schools So what has caused this wholesale embrace of neuroscience in the classroom a well intentioned but naive misunderstanding of how science works ideological reasons or financial incentives Neuroscience in Education brings together an international group of leading psychologists neuroscientists and geneticists to critically review some of these new developments examining the science behind these practices the validity of the theories on which they are based and whether they work It will be fascinating reading for anyone involved in education including psychologists teachers and policy makers

A European Politics of Education Romuald Normand, Jean-Louis Derouet, 2016-06-10 A European Politics of Education proposes a sociology of education establishing connections between empirical data coming from European scale comparative surveys normative assumptions structuring actors representations and interpretative judgements and a specific focus on Lifelong Learning policy areas It invites readers to think about the place of standards expertise and calculations in the European space from a common perspective supported by a tradition of critical sociology and European political studies The book Addresses an important agenda how the policies and politics of supranational Europe are making a European educational space Contains a response to the emergence of new epistemic governance and instruments at European level Contains contributions from the EU and the UK which give a comprehensive selection of perspectives and analysis of the field as it concerns Europe The complexity of the contemporary European education policy space is addressed here with new lines of inquiry as well as a reflexive outlook on standardization policy making and actor engagement Students and researchers of European policy studies education policy analysts and theorists will all be particularly interested readers
