

Natural Sciences Grade 8 Term 3 Summaries

Unit 1 What is static electricity?

- **static electricity:**
 - electric charge that an object has as a result of friction; not flowing electricity
- Electrons move from one atom to another atom.
- An atom that loses electrons has more positive charges (protons) than negative charges (electrons).
- This is known as positively charged.
- An atom that gains electrons has more negative particles than positive particles. This is known as negatively charged.
- When charges are separated in this way, they are known as static electricity or electrostatics. Charge is never created or destroyed.
- Negative charges are transmitted from one object to another.
- This is known as the Principle of the Conservation of Charge.
- If two materials have different charges, they attract each other.
- If two materials have the same charge, they provide resistance to each other or push each other away.

- Similar charges repel each other; unequal charges attract each other
- **friction:** when two objects are rubbed.

Unit 2 Electric charge Electric

power fields

- •Thrust or traction in static electricity can be described by the concept of a force field.
- An electric force field surrounds every particle that has an electric charge force field.
- The electric charge creates a force field in the empty space around it.
- An electron in this force field is positively attracted by positive (+) charges or it can be pushed away from negative (-) charges.

Sparks in static electricity

- A release of electrons causes the sparks or shock or static electricity.
- This means that a stream of electrons is released from an object.
- Sparks can usually be seen when passing negative charges to conductors.
- A spark will also occur if an air vent occurs between the object releasing the electrons and the object to which it is transferred.
- The electrons jump over the air vent.
- They heat the air to high temperatures causing the air to glow or expand.
- You observe it as a spark or hear a crackle.

Electric charge:

- a storage of electricity electrical power: the amount of attraction or repulsion force between two objects

Education for Knowing Paul A. Wagner, Frank K. Fair, 2020-10-30 If our goal is Education for Knowing as the title says then we need to be guided by a conception of what knowing is For example we can all agree that there are math facts that students need to learn and we can agree that there are general concepts and laws that students should be acquainted with But is there more involved perhaps something like nurturing in students a desire to probe deeper into the workings of thing Or developing a capacity to explain why things work the way they do Our conceptions of what genuine knowing is serve as guides to what we think the goal of education is and they tell us how to build a student However as it turns out there are multiple conceptions of what knowing truly involves and these conceptions tend to be different for different sets of education stakeholders such as parents and their children school administrators and educational researchers Understanding this diversity of conceptions of knowing will make it easier for representatives of the different stakeholder groups to work together to accomplish the goal of building knowing students

Handbook of Automated Scoring Duanli Yan, André A. Rupp, Peter W. Foltz, 2020-02-26 Automated scoring engines require a careful balancing of the contributions of technology NLP psychometrics artificial intelligence and the learning sciences The present handbook is evidence that the theories methodologies and underlying technology that surround automated scoring have reached maturity and that there is a growing acceptance of these technologies among experts and the public From the Foreword by Alina von Davier ACTNext Senior Vice President Handbook of Automated Scoring Theory into Practice provides a scientifically grounded overview of the key research efforts required to move automated scoring systems into operational practice It examines the field of automated scoring from the viewpoint of related scientific fields serving as its foundation the latest developments of computational methodologies utilized in automated scoring and several large scale real world applications of automated scoring for complex learning and assessment systems The book is organized into three parts that cover 1 theoretical foundations 2 operational methodologies and 3 practical illustrations each with a commentary In addition the handbook includes an introduction and synthesis chapter as well as a cross chapter glossary

Impacts of Marine Litter Luisa Galgani, Ricardo Beiras, Francois Galgani, Cristina Panti, Angel Borja, 2019-08-15 **Nanobiotechnology** Sougata Ghosh, Thomas J Webster, 2021-05-20 Nanobiotechnology Microbes and Plant Assisted Synthesis of Nanoparticles Mechanisms and Applications covers in detail the green synthesis of nanostructures of tailor made size shape and physico chemical and opto electronic properties The rationale behind the selection of bacteria cyanobacteria algae fungi virus and medicinal plants for the synthesis of biologically active exotic nanoparticles for biomedical applications is also part of this book It also explores metal recovery bioconversion detoxification and removal of heavy metals using nanobiotechnology and discusses the potential of nanobiotechnology to address environmental pollution and toxicity The book further covers the economic and commercial aspects of such green nanobiotechnology initiatives its current status in intellectual property

rights like patents filed so far globally technology transfers and market potential This information enables one to decipher the scope of biogenic nanoparticles and its prospects Provides an overview on the general and applied aspects on nanotechnology Gives the scope of exploring bacteria fungi algae virus and medicinal plants for the synthesis of exotic nanoparticles Furnishes a comprehensive report on the underlying molecular mechanisms behind the biosynthesis of nanoparticles Outlines sustainable alternative strategies of bioremediation of heavy metals metal recovery detoxification and bioconversion using nanobiotechnology Explores the promises of patenting technology transfer and commercialization potential of biogenic nanoparticles

Handbook of Cannabis for Clinicians Dustin Sulak DO,2021-06-29 The first foundational text on the clinical use of cannabis and cannabinoid therapies Despite thousands of years of medical use and an impressive record of safety versatility and efficacy Cannabis sativa has existed outside the modern pharmacopeia since the 1940s Primarily driven by popular demand this botanical has returned to health care but most clinicians lack the knowledge essential for identifying candidates for treatment guiding patients maximizing benefit and minimizing harm Dustin Sulak provides health care professionals including physicians psychologists pharmacists and nurses with an accessible and evidence based reference that empowers them to intelligently discuss cannabis with their patients and implement cannabis and cannabinoid therapies with confidence Based on over a decade of clinical experience and an extensive review of the literature this detailed and scientifically accurate guide includes the history of cannabis in medicine the foundations of endocannabinoid physiology the pharmacological effects of cannabis myriad active constituents the clinical utility of its various preparations and specific strategies and cautions for treating the most common conditions presenting to a cannabis clinician This guide is an essential resource for practitioners of any specialty field or experience level who wish to improve their patients outcomes harness the healing potential of the endocannabinoid system and wield a powerful solution to many of healthcare s challenges
