

## ECONOMICAL SINGLE CHANNEL DROP-OFFS

Looking for the most reliable, low-cost way of providing communications to remote pumping or producing stations? With the Lenkurt 34A stackable radio carrier system you can drop-off single channels for voice, telemetering and supervisory control at only a fraction of the usual "large system" cost. ■ Such economy is possible because channels comprising the basic eight channel group are independent of each other and can be added one-by-one, without common equipment. Adding only group mod-

ulation equipment, you can continue to expand the system up to 24 channels. ■ Other features that make the 34A highly practical for pipeline communications include full synchronization to insure that crucial commands to open and close valves are received as sent, solid-state design for low power drain, and three power options (24 or 48 volt d.c.; 115 volt a.c.). ■ If your company depends on you for the selection of carrier equipment, be sure to get complete literature on the 34A from your Lenkurt representative.
