The Gateway to the Pacific Meredith Oda, 2019-01-03 In the decades following World War II municipal leaders and ordinary citizens embraced San Francisco's identity as the Gateway to the Pacific using it to reimagine and rebuild the city The city became a cosmopolitan center on account of its newfound celebration of its Japanese and other Asian American residents its economy linked with Asia and its favorable location for transpacific partnerships The most conspicuous testament to San Francisco's postwar transpacific connections is the Japanese Cultural and Trade Center in the city's redeveloped Japanese American enclave Focusing on the development of the Center Meredith Oda shows how this multilayered story was embedded within a larger story of the changing institutions and ideas that were shaping the city During these formative decades Oda argues San Francisco's relations with and ideas about Japan were being forged within the intimate local sites of civic and community life This shift took many forms including changes in city leadership new municipal institutions and especially transformations in the built environment Newly friendly relations between Japan and the United States also meant that Japanese Americans found fresh if highly constrained job and community prospects just as the city's African Americans struggled against rising barriers San Francisco's story is an inherently local one but it also a broader story of a city collectively if not cooperatively reimagining its place in a global economy

Renewing Cities Ross J. Gittell, 2014-07-14 The cities of Lowell and New Bedford in Massachusetts Jamestown in New York and McKeesport in Pennsylvania have all undergone years of adversity and decline their economic bases having been badly damaged by structural changes in the national economy particularly in the manufacturing sector In situations like these can local development efforts make a difference Ross Gittell answers in the affirmative This interdisciplinary work focuses on comparative case studies of the four cities The book reveals how public private and community based local economic development initiatives affect local economic performance what works and what does not work City leaders and institutions

can help reorganize and reshuffle local resources with results that include increased investment greater effort by local individuals and institutions more cooperation among different development interests and improvement in city economic positioning relative to the regional economy and local development cycles Gittell emphasizes the possibility of shifting from a zero sum game attracting jobs from elsewhere toward the goal of converting underutilized local resources to higher value uses through alternative forms of economic and political organization Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
