changes to enhance the text's flow. As the following features indicate, the major thrust of the new edition is to enhance accessibility and further stimulate student interest.

Concepts in Biology Eldon Enger, Frederick Ross, David Bailey, 2008-01-16

Concepts in Biology is a relatively brief introductory general biology text written for students with no previous science background. The authors strive to use the most accessible vocabulary and writing style possible while still maintaining scientific accuracy. The text covers all the main areas of study in biology from cells through ecosystems. Evolution and ecology coverage are combined in Part Four to emphasize the relationship between these two main subject areas. The new 13th edition is the latest and most exciting revision of a respected introductory biology text written by authors who know how to reach students through engaging writing, interesting issues and applications, and accessible level. Instructors will appreciate the book's scientific accuracy, complete coverage, and extensive supplement package.

Custom Casebound Rebind of Biology Wallace, 1998-03

Essential Genetics Daniel L. Hartl, 1996

This textbook is designed for an introductory one semester or one quarter course in genetics. The learning objectives are to understand the basic processes of gene transmission, mutation, expression, and regulation; to learn to formulate genetic hypotheses; to develop basic skills in problem solving; and to gain some sense of the social and historical context in which genetics has developed.
