HOW EVAPORATIVE COOLING WORKS

Evaporative cooling is nature's way of cooling. When air is moved over a wet surface, water is evaporated and heat is absorbed. When stepping out of a swimming pool with the wind blowing, evaporative cooling makes you feel cool, even though the air may be warm. The human body itself is cooled primarily by the evaporation of perspiration.

This unit works on the same principle. Air is drawn across wet filter pads where the air is cooled by evaporation and then circulated throughout the building. It is this combination of cooled air and the movement of air over the skin which makes it feel cool.

Unlike refrigeration systems which recirculate the air, an evaporative cooler continually brings in fresh air while exhausting old air. You are completely replacing the air every 2 to 4 minutes by opening windows or doors or a combination of both. The air is always fresh, not stale, laden with smoke and odors as happens with refrigerated air conditioning.

READ AND SAVE THESE INSTRUCTIONS

1. Read these instructions carefully.
2. Unit must be in the **ON Position** and **Unplugged** from power receptacle when installing or performing any maintenance.
3. This cooler will run on 120 volt A.C., 60 Hz (cycle) current only.
4. Motor and pump are grounded and have an automatic thermal overload switch which will shut motor off if it overheats. The motor will restart automatically when it cools down.
5. Pump receptacle is for grounded evaporative cooler pump only. Do not plug anything else into receptacle.
6. Do Not operate any fan with a damaged cord or plug. Discard fan or return to an authorized service facility for examination and/or repair.
7. Do Not run cord under carpeting. Do Not cover cord with throw rugs, runners or similar coverings. Do Not route cord under furniture or appliances. Arrange cord away from traffic area and where it will not be tripped over.
8. Use only in GFCI protected receptacles.

⚠WARNING: To reduce the risk of fire or electric shock, do not use this fan with any "solid-state fan speed control device."
