<sup>5</sup> 406.1 – 420 MHz is available in the NTIA market place.

<sup>6</sup> Rated power output is measured at the transmitter's power amplifier output connector. Optional items such as power measuring devices and/or duplexers will introduce loss between the transmitter output connector and the station cabinet output connector. This loss will reduce the available power at the station connector. It is the responsibility of the license holder to ensure that rated power is 50 W at the output connector for Part 80 applications.

<sup>7</sup> Beginning with Baseband Processor Rev. D, an external reference is no longer required to meet this specification.
