

Grounding, Metaphysical Explanation, and the Structure of Reality

ABSTRACT: This paper explores a new approach to characterising the structure of reality. *Sensum* is to be characterised in terms of metaphysical explanations, where metaphysical explanations are answers to *what-makes-it-the-case-that* questions. Constraints on the question asked guarantee the role of understanding in explanation, and allow (but do not require) that explanations might be holistic, and might obtain in domains of discourse about which we are uncertain. I consider some objections to the view, in particular to my claim that metaphysical structure is not itself fundamental, and I argue that the account developed here is superior to accounts which take the structure of reality to be characterised in terms of grounding relations.

Contemporary metaphysics has become preoccupied with talk of grounding. Grounding relations are thought to be apt to cash out our intuitions about ontological dependence, to characterise the structure of reality, and to back a certain kind of explanation. In this paper I argue that the work earmarked for grounding can be achieved, more simply and more effectively, by concentrating instead on the notion of metaphysical explanation with which grounding is usually taken to be closely associated. In the literature, talk of metaphysical explanation is somewhat vague, and the notion is underdeveloped and very rarely discussed apart from in discussions of grounding. My aim here is to develop a stand-alone theory of metaphysical explanation, and to explain how we can use it in characterising the structure of reality.

I begin in §1 by briefly introducing the notion of grounding and its relation to explanation and fundamentality. In §2 I highlight key features of the discussion of metaphysical explanation in the literature. §3 is where I outline my preferred account of metaphysical explanation, and I explain how it can be used to give a characterisation of the structure of reality in §4. In §5 I compare the picture I develop here with the orthodox picture which includes both grounding and metaphysical explanation.¹ §6 concludes.

¹ I am not able here to consider other approaches to limiting the structure of reality, such as those developed by Chalmers (2012), Lewis (1983; 1984; 1986), or Sider (2011). I am also not able to consider alternatives to my preferred way of thinking about metaphysical explanation in any detail.

Metaphysical Grounding Understanding The Structure Of Reality:

Metaphysical Grounding Fabrice Correia, Benjamin Schnieder, 2012-10-04 This anthology systematically investigates philosophical ideas about priority and comprises original contributions on particular questions about priority and an introduction which provides a broader survey of the debate addressing its history as well as its central systematic aspects Of interest to students and scholars of metaphysics

Metaphysical Grounding Fabrice Correia, Benjamin Schnieder, 2012 Some of the most eminent and enduring philosophical questions concern matters of priority what is prior to what What grounds what Is for instance matter prior to mind Recently a vivid debate has arisen about how such questions have to be understood Can the relevant notion or notions of priority be spelled out And how do they relate to other metaphysical notions such as modality truth making or essence This volume of new essays by leading figures in contemporary metaphysics is the first to address and investigate the metaphysical idea that certain facts are grounded in other facts An introduction introduces and surveys the debate examining its history as well as its central systematic aspects The volume will be of wide interest to students and scholars of metaphysics

Reality and Its Structure Ricki Bliss, Graham Priest, 2018 Reality is a rather large place It contains protons economies headaches sentences smiles asteroids crimes numbers and very many other things Much of the content of our reality appears to depend on other of its content Economies for example appear to depend upon people and the way they behave amongst other things Some of the content of our reality also appears to be in some significant sense more important than other of its content Whilst none of us would wish to deny the very important role that economies play in our lives most of us would agree that without matter arranged certain ways in space for example there could be no economies in the first place Very many contemporary philosophers are concerned with how exactly we are to fill in the details of this view What they are inclined to agree on is that reality has an over arching hierarchical structure ordered by relations of metaphysical dependence where chains of entities ordered by those dependence relations terminate in something fundamental It is also commonly taken for granted that what those dependence chains terminate in is merely contingently existent those things could have failed to exist and consistent they have no contradictory properties This volume brings together fifteen essays from leading and emerging scholars that address these core yet often under explored commitments

Reality Making Mark Jago, 2016-02-12 What makes up reality and how What kinds of entity are fundamental to reality and how do dependent entities depend on the fundamental ones How does one entity metaphysically ground another These questions are central to contemporary metaphysics The papers in this collection written by a new generation of metaphysicians address these and related questions They investigate the metaphysical concepts of grounding and fundamentality and the relationship between the fundamental and all the other parts of reality Together these papers represent the cutting edge of a central topic in contemporary metaphysics

Conjunctive Explanations in Science and Religion Diarmid A. Finnegan, David H. Glass, Mikael Leidenhag, David N. Livingstone, 2023-02-28 This book investigates the

nature and relevance of conjunctive explanations in the context of science and religion It explores questions concerning how scientific and religious explanations for features of the world or phenomena within it relate to each other and whether they might work together in mutually enriching ways The chapters address topics including the relationship between Darwinian and teleological explanations non reductive explanations of mind and consciousness and explanations of Christian faith and religious experience while others explore theological and philosophical issues concerning the nature and feasibility of conjunctive explanations Overall the contributions help to provide conceptual clarity on how scientific and religious explanations might or might not work together conjunctively as well as exploring how these ideas relate to specific topics in science and religion more generally *The Routledge Handbook of Metametaphysics* Ricki Bliss,J.T.M. Miller,2020-07-14

Philosophical questions regarding the nature and methodology of philosophical inquiry have garnered much attention in recent years Perhaps nowhere are these discussions more developed than in relation to the field of metaphysics The Routledge Handbook of Metametaphysics is an outstanding reference source to this growing subject It comprises thirty eight chapters written by leading international contributors and is arranged around five themes The history of metametaphysics Neo Quineanism and its objectors Alternative conceptions of metaphysics The epistemology of metaphysics Science and metaphysics Essential reading for students and researchers in metaphysics philosophical methodology and ontology The Routledge Handbook of Metametaphysics will also be of interest to those in closely related subjects such as philosophy of language logic and philosophy of science *The Routledge Handbook of Essence in Philosophy* Kathrin Koslicki,Michael J. Essences have been assigned important but controversial explanatory roles in philosophical scientific and social theorizing Is it possible for the same organism to be first a caterpillar and then a butterfly Is it impossible for a human being to transform into an insect like Gregor Samsa does in Kafka s *The Metamorphosis* Is it impossible for Lot s wife to survive being turned into a pillar of salt Traditionally essences or natures have been thought to help answer such central questions about existence identity persistence and modality These questions are not only of great philosophical interest they also are of great interest to society at large This Handbook surveys the state of the art on essence Core issues about essence are discussed in 33 chapters all of them written exclusively for this volume by leading experts They are organized into the following four major parts each with its own introduction that provides a summary and comparison of the part s chapters History Essence and Essentialisms Themes and Variations Applications Anti Essentialist Challenges The volume is accessible enough for students while also providing enough details to make it a valuable reference for researchers While the notion of essence has been targeted for sustained criticisms since antiquity recent work has renewed interest in the topic This Handbook explains and synthesizes much of this current interest placing essence within its historical context and drawing connections to many contemporary areas of philosophy as well as to scholarly work in other disciplines With cross references in each chapter and a comprehensive index *The Routledge Handbook of Essence in Philosophy* is a useful resource and
