11. The gas particles inside a lower balloon, causing it to expand, will be contained at a **less** higher rate.

Using that model of the balloon should not depend on size, the gas particles should still move faster. Thus, think about what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon. That's what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon. That's what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon.
