

## INSTALLING BATTERIES

### Cautions:

- Use only fresh batteries of the required size and recommended type.
- Do not mix old and new batteries, different types of batteries (standard, alkaline or rechargeable), or rechargeable batteries of different capacities.
- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the vehicle before being charged.
- Rechargeable batteries are only to be charged under adult supervision.
- Only batteries of the same or equivalent type as recommended are to be used.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the vehicle. Never leave dead or weak batteries in the vehicle or transmitter.
- The supply terminals are not to be short-circuited.
- If you will not be using the vehicle for several days, remove the batteries. Batteries can leak chemicals that can damage electronic parts.
- Dispose of batteries promptly & properly; do not bury or burn them.
- Charger used with the vehicle are to be regularly examined for damage to the cord, plug, enclosure and other parts, and that, in the event of such damage, the vehicle must not be used with this charger until the damage has been repaired.

- Keep the package and owner's manual since it contains important information.

### In the Transmitter

The transmitter requires one 9-volt battery (not included). Remove the battery compartment cover and place the battery in the transmitter as indicated by the polarity symbols (+ and -) marked inside. Replace the cover. When the transmitter's range decreases, replace its battery. For the best performance and longest life, we recommend an alkaline battery.

### In the Vehicle

The vehicle requires one 7.2 volt rechargeable battery pack and one 9 volt battery (not included) in separate compartments.

Install the 7.2 volt rechargeable battery pack

1. Use a coin to loosen the screw on the battery compartment cover located at the rear end of vehicle and remove it.

2. Place the battery pack in the compartment and attach its white connector to the vehicle's matching connector. Do not force them together, they only fit one way.
3. Replace the cover and secure with the screw.

Install the 9 volt battery

1. Use a coin to loosen the screw on the battery compartment cover located on the bottom of vehicle and remove it.
2. Attach the 9 volt battery to the battery snap in the compartment.
3. Replace the cover and secure with the screw.

**Caution :** The 7.2 volt rechargeable battery pack **MUST BE FULLY CHARGED** before you can use it to power the vehicle.

If the vehicle moves slowly or does not move at all, recharge the vehicle's battery pack.

## DRIVING THE VEHICLE

**Antenna Tube** - The supplied plastic antenna tube holds up the antenna wire for the best reception and range. Route the antenna wire's loose end through the tube. Then insert the tube securely into the vehicle's tube holder.

1. Set the ON/OFF switch on Transmitter to ON. The power indicator LED illuminates.
2. Fully extend the antenna. For maximum range, hold the transmitter with the antenna as high as possible and point it straight up.
3. Set the ON/OFF power switch on bottom of vehicle to ON.
4. Use the Transmitter to drive and steer your vehicle.
