

## LOSING THEIR EUCALYPTUS TREES

Before Europeans settled Australia, some ten million koalas thrived along the east coast in eucalyptus and *Callitris* stands. Nearly two-thirds of these forests have since been removed. Although population estimates are incomplete and controversial, koala numbers are in decline and may well total fewer than 100,000.

**Essential Maps for the Lost** Deb Caletti, 2016-04-05 When Mads discovers a dead body while she's swimming in the lake she begins to obsess over who the woman was and what led her to commit suicide by jumping off a bridge. But when she starts to fall for Billy the woman's troubled son Mads isn't sure how much longer she can keep her obsession a secret. The Social Life of Maps in America, 1750-1860 Martin Brückner, 2017-10-26 In the age of MapQuest and GPS we take cartographic literacy for granted. We should not. The ability to find meaning in maps is the fruit of a long process of exposure and instruction. A cartographically coded America, a nation in which maps are pervasive and meaningful, had to be created. *The Social Life of Maps* tracks American cartography's spectacular rise to its unprecedented cultural influence. Between 1750 and 1860 maps did more than communicate geographic information and political pretensions. They became affordable and intelligible to ordinary American men and women looking for their place in the world. School maps quickly entered classrooms where they shaped reading and other cognitive exercises; giant maps drew attention in public spaces; miniature maps helped Americans chart personal experiences. In short, maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts, theatrical performances, and the communication of emotions. This lavishly illustrated study follows popular maps from their points of creation to shops and galleries, schoolrooms and coat pockets, parlors and bookbindings. Between the decades leading up to the Revolutionary War and the Civil War, early Americans bonded with maps. Martin Brückner's comprehensive history of quotidian cartographic encounters is the first to show us how

**Place, Identity, and National Imagination in Post-war Taiwan** Bi-yu Chang, 2015-03-24 In the struggles for political and cultural hegemony that Taiwan has witnessed since the 1980s, the focal point in contesting narratives and the key battlefield in the political debates are primarily spatial and place-based. The major fault line appears to be a split between an imposed identity emphasizing cultural origin China and an emphasis on the recovery of place identity of the local Taiwan. *Place Identity and National Imagination in Postwar Taiwan* explores the ever-present issue of identity in Taiwan from a spatial perspective and focuses on the importance of and the relationship between state spatiality and identity formation. Taking postwar Taiwan as a case study, the book examines the ways in which the Kuomintang regime naturalized its political control, territorialized the island, and created a nationalist geography. In so doing, it examines how, why, and to what extent power is exercised through the place-making process and considers the relationship between official versions of ROC geography and the islanders' shifting perceptions of the nation. In turn, by addressing the relationship between the state and the imagined community, Bi-yu Chang establishes a dialogue between place and cultural identity to analyse the constant changing and shaping of Chinese and Taiwanese identity. With a diverse selection of case studies including cartographical development, geography education, territorial declaration, and urban planning, this interdisciplinary book will have a broad appeal across Taiwan studies, geography, cultural studies, history, and politics.
