Advanced Materials, Mechanical and Structural Engineering Seung Hong,Junwon Seo,Kihoon Moon,2016-04-14 In the last decades advanced materials and mechanics has become a hot topic in engineering Recent trends show that the application of nanotechnology and environmental science together with advanced materials and mechanics are playing an increasingly important role in engineering applications For catching up with this current trend this boo   *Robotics and Automation Handbook* Thomas R. Kurfess,2018-10-03 As the capability and utility of robots has increased dramatically with new technology robotic systems can perform tasks that are physically dangerous for humans repetitive in nature or require increased accuracy precision and sterile conditions to radically minimize human error The Robotics and Automation Handbook addresses the major aspects of designing fabricating and enabling robotic systems and their various applications It presents kinetic and dynamic methods for analyzing robotic systems considering factors such as force and torque From these analyses the book develops several controls approaches including servo actuation hybrid control and trajectory planning Design aspects include determining specifications for a robot determining its configuration and utilizing sensors and actuators The featured applications focus on how the specific difficulties are overcome in the development of the robotic system With the ability to increase human safety and precision in applications ranging from handling hazardous materials and exploring extreme environments to manufacturing and medicine the uses for robots are growing steadily The Robotics and Automation Handbook provides a solid foundation for engineers and scientists interested in designing fabricating or utilizing robotic systems   *Advances in Computer, Communication, Control and Automation* Yanwen Wu,2011-11-20 The volume includes a set of selected papers extended and revised from the 2011 International Conference on Computer Communication Control and Automation 3CA 2011 2011 International Conference on Computer Communication Control and Automation 3CA 2011 has been held in Zhuhai China November 19 20 2011 This volume topics covered include signal and Image processing speech and audio Processing video processing and analysis artificial intelligence computing and intelligent systems machine learning sensor and neural networks knowledge discovery and data mining fuzzy mathematics and Applications knowledge based systems hybrid systems modeling and design risk analysis and management system modeling and simulation We hope that researchers graduate students and other interested readers benefit scientifically from the proceedings and also find it stimulating in the process   Smart Biolabs of the Future Sascha Beutel,Felix Lenk,2022-09-06 This book reviews the advances in data gathering and processing in the biotech laboratory environment and it sheds new lights on the various aspects that are necessary for the implementation of intelligent laboratory architecture and infrastructure Smart technologies are increasingly dominating our everyday lives and have become an indispensable part of the industrial environment The laboratory environment which has long been rather conservative has also set out to adapt smart technologies with regards to Industry 4 0 and the Internet of Things IoT for the laboratory Due to the heterogeneity of

the existing infrastructure and the often complex work processes standardization is slow e g to implement device interfaces or standardized driver protocols which are urgently needed to generate standardized data streams that would be immanent for post processing of data Divided into 9 chapters this book offers an authoritative overview of the diverse aspects in the generation and recording of uniform data sets in the laboratory and in the processing of the data and enabling seamless processing towards machine learning and artificial intelligence In the first part of the book readers will find more about high throughout systems automation robotics and the evolution of technology in the laboratory The second part of the book is devoted to standardization in lab automation in which readers will learn more about some regulatory aspects the SiLA2 standards the OPC LADS Laboratory and Analytical Device Standard and FAIR Data infrastructure   *The Automated Factory Handbook* David I.
