- Leaked/hacked emails – November 2009.
- "Manipulation of evidence;
- Private doubts about whether the world really is heating up;
- Suppression of evidence;
- Fantasies of violence against prominent Climate Sceptic scientists;
- Attempts to disguise the inconvenient truth of the Medieval Warm Period;
- how best to squeeze dissenting scientists out of the peer review process" (*Telegraph*, 20-11-09).
- BUT now cleared of malpractice by Lord Oxburgh.

## **Lord Oxburgh Climategate Report April 14:**

The Inquisition of Climate Science James Lawrence Powell, 2011-08-30 Modern science is under the greatest and most successful attack in recent history An industry of denial abetted by news media and information broadcasters more interested in selling controversy than presenting facts has duped half the American public into rejecting the facts of climate science an overwhelming body of rigorously vetted scientific evidence showing that human caused carbon based emissions are linked to warming the Earth The industry of climate science denial is succeeding public acceptance has declined even as the scientific evidence for global warming has increased It is vital that the public understand how anti science ideologues pseudo scientists and non scientists have bamboozled them We cannot afford to get global warming wrong yet we are thanks to deniers and their methods The Inquisition of Climate Science is the first book to comprehensively take on the climate science denial movement and the deniers themselves exposing their lack of credentials their extensive industry funding and their failure to provide any alternative theory to explain the observed evidence of warming In this book readers meet the most prominent deniers while dissecting their credentials arguments and lack of objectivity James Lawrence Powell shows that the deniers use a wide variety of deceptive rhetorical techniques many stretching back to ancient Greece Carefully researched fully referenced and compellingly written his book clearly reveals that the evidence of global warming is real and that an industry of denial has deceived the American public putting them and their grandchildren at risk

**Making Sense of Nature** Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western

newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences      *Feeling The Heat* Jo Chandler,2011-05-01 In *Feeling the Heat* journalist Jo Chandler sets out on a quest that takes her across the Antarctic ice under the seas and through the tropical rainforests of far north Queensland Her mission is to explore one of the defining mysteries of our age climate change The story Chandler tells is an epic adventure complete with heroes and villains It s a love story for those with an affection for nature A reality show like no other It s also a story of science in its most glorious pure form Chandler takes us into wild landscapes in the company of scientists trying to decode climate information that will be critical to the decisions we make for the future of the planet Written in the vein of Susan Orlean s *The Orchid Thief* and by turn lyrical funny and achingly sad *Feeling the Heat* reveals startling truths about that delicate confounding organism we call Earth Winner 2012 Bragg UNSW Press Prize for Science Writing Shortlisted 2011 Queensland Premier s Literary Awards Science Writer Award Longlisted 2012 John Button Prize      **Who Speaks for the Climate?** Maxwell T. Boykoff,2011-09-22 The public rely upon media representations to help interpret and make sense of the many complexities relating to climate science and governance Media representations of climate issues from news to entertainment are powerful and important links between people s everyday realities and experiences and the ways in which they are discussed by scientists policymakers and public actors A dynamic mix of influences from internal workings of mass media such as journalistic norms to external political economic cultural and social factors shape what becomes a climate story Providing a bridge between academic considerations and real world developments this book helps students academic researchers and interested members of the public make sense of media reporting on climate change as it explores who speaks for climate and what effects this may have on the spectrum of possible responses to contemporary climate challenges
