Mclean's University Guide:

Maclean's Guide to Bombay James Mackenzie Maclean, 1875 *Counting Out The Scholars* William Bruneau, Donald C. Savage, Canadian Association of University Teachers, 2002-03-07 Canada's universities have lost their autonomy Under the guise of accountability reformers from government and large corporations have undermined the original purposes of these institutions insisting that they operate according to a business model The chief tool used to effect this change is the performance indicator a method of evaluation and ranking well suited to measuring sales per square foot for example but useless in assessing qualities such as critical thinking creativity and wisdom Evaluating use of performance indicators in Canada the United States United Kingdom and New Zealand the authors challenge readers to look beyond this narrow business based measure of value and to consider more creative and effective methods of evaluation *Counting Out the Scholars* is a penetrating analysis of current methods of performance evaluation in the university one that offers alternatives to the prevailing orthodoxy **The Routledge International Handbook of Higher Education** Malcolm Tight, Ka Ho Mok, Jeroen Huisman, Christopher Morpew, 2009-06-03 This volume is a detailed and up to date reference work providing an authoritative overview of the main issues in higher education around the world today Consisting of newly commissioned chapters and impressive journal articles it surveys the state of the discipline and includes the examination and discussion of emerging controversial and cutting edge areas *The Curiosity of School* Zander Sherman, 2012-08-07 It's one thing we all have in common We've all been to school But as Zander Sherman shows in this fascinating often shocking account of institutionalized education sending your kids off to school was not always normal In fact school is a very recent invention Taking the reader back to 19th century Prussia where generals worried about soldiers troubling individuality sought a way to standardize every young man of military age through to the most controversial debates that swirl around the world about the topic of education today Sherman tells the often astonishing stories of the men and women and corporations that have defined what we have come to think of as both the privilege and the responsibility of being educated Along the way we discover that the SAT was invented as an intelligence test designed to allow the state to sterilize imbeciles that suicide in the wake of disappointing results in the state university placement exams is the fifth leading cause of death in China and that commercialized higher education seduces students into debt as cynically as credit card companies do Provocative entertaining and even educational *The Curiosity of School* lays bare the forces that shape the institution that shapes all of us Leadership Under Fire Ross H. Paul, 2011 While the role of the university president has evolved dramatically in recent years the recruitment pool and selection process have changed little since the 1960s In *Leadership Under Fire* Ross Paul combines leadership theory interviews with eleven of Canada's most successful presidents and thirty five years of personal experience to shed light on the complexity and importance of leading a university and identifies some of the critical challenges and opportunities facing Canadian universities today Paul illuminates some of the ways in which Canadian

universities are unique and uses these differences to make clear the importance of organizational cultural and institutional fit for leaders confronting critical academic issues such as academic leadership and accountability student success and support university funding and fund raising strategic planning government and community relations and internationalism His analysis reaffirms some long standing practices while arguing that changes are badly needed in others While much has been written about university leadership elsewhere Leadership Under Fire focuses on Canada and some of the men and women who have made a real difference to the quality of its post secondary institutions Paul builds on their stories to offer useful perspectives and advice at a time when the quality of universities was never more critical to the country's economic social and political success
