So You Want a Meade LX Telescope! Lawrence Harris, 2010-07-20 Computers and Astronomy Perhaps every generation of astronomers believes that their telescopes are the best that have ever been They are surely all correct The great leap of our time is that computer designed and machined parts have led to more accurately made components that give the astronomer ever better views The manual skills of the craftsman mirror grinder have been transformed into the new age skills of the programmer and the machine maker The new products did not end the work of craftsman telescope makers though Many highly skilled amateur professional opticians continued to produce good quality mirrors that are still seen today Amateur priced telescopes are now capable of highly accurate tracking and computer control that were once only the province of professionals This has greatly increased the possibilities of serious astronomy projects for which tailor made software has been developed Add a CCD camera to these improved telescopes see Chap 3 and you bring a whole new dimension to your astronomy see Fig 1 1 Look Before You Leap But first a word of caution Unless you are already familiar with astronomy and basic telescopes it is not wise to start spending large amounts of money on a we featured telescope Such an instrument might otherwise be subsequently abandoned due to a perceived overcomplexity coupled with a waning interest **A User's Guide to the Meade LXD55 and LXD75 Telescopes** Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very

different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility. My motivation to write a book about the LX D Goto telescope series first came from comments about an LX D55 AR 6 Refractor review that was published on the LX D55 com website. From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them. Whilst attending Star parties in the UK I found that many LX D owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before. Since the first LX D55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage. There have been mixed reactions about its quality and performance. Hence this book is directed towards those who are new to Goto and the LX D telescope.

**A User's Guide to the Meade LX D55 and LX D75 Telescopes** Martin Peston, 2011-09-17 This book offers a comprehensive introductory guide to choosing and using a series LX D55 or LX D75 computer controlled goto telescope containing a wealth of useful information for both beginners and more advanced practical amateur astronomers. The manufacturer's manuals are not nearly detailed enough to be of real help to beginners. No other book offers advanced techniques for more experienced LX D series users.

Using the Meade ETX Mike Weasner, 2012-12-06 The Meade ETX range of telescopes is one of the most successful ever made. It is low cost, has sold in its tens of thousands and is available in almost every country. Here ETX expert Mike Weasner reveals everything any amateur astronomer ever wanted to know about the telescope. First book dedicated entirely to the ETX. Written by an acknowledged world authority. Describes the best 100 objects to begin observing. Contains detailed hints and tips aimed at getting the best out of the ETX. Features imaging photographic and digital as well as visual observing.

**The 20-cm Schmidt-Cassegrain Telescope** Peter L. Manly, 1994-09-15 The 20 cm 8 in Schmidt Cassegrain telescope is the most popular telescope in the world. This compact instrument revolutionized amateur astronomy and astrophotography and more than ten thousand are purchased each year. Manly, a devotee and keen user of the Schmidt Cassegrain, takes the telescope owner in easy stages through all aspects of using the telescope. He starts with techniques for viewing the Moon, then takes the observer through our planetary system and on to the deep sky where nebulae and galaxies are treated extensively. There are interesting projects to try such as observing the nearest star and chasing eclipses. The book describes a full range of telescope accessories and detectors together with advice on their use. The 40 page appendix is packed with hard to find practical information. Peter Manly is the author of *Unusual Telescopes* CUP 1992.
