- The 12-hour/24-hour timekeeping format you select in the Timekeeping Mode is applied in all other modes.

Stopwatch

You can use the stopwatch to measure elapsed time, lap times and split times. If you specify a distance value, the stopwatch also with calculate and display splits.

- The digital display range of the stopwatch is 99.99 hours, 59 minutes, 59.99 seconds. The stopwatch continues to run until you stop it. If it reaches the about limit, it will avoid the time measurement from zero.
- The stopwatch operation continues even if you exit the Stopwatch Mode. If you exit the Stopwatch Mode while a stopwatch operation is in progress, the segments in the lower right also will appear and disappear sequentially as stopwatch seconds are counted. This is to let you know that a stopwatch operation is in progress.
- As of the segments in this section are performed in the Stopwatch Mode, which you enter by pressing (C).

Important

- Check to make sure that the speed sensor is not moving before you perform any Stopwatch Mode button operation.

Specifying a Distance Value

You can use the procedure below to specify a distance value. If you want, if you specify a distance value, the watch will calculate and indicate splits for certain stopwatch operations.

- The distance value represents kilometers, miles, or any other distance unit you want. Specifying a distance value of 10.0, for example, can mean 10.0 kilometers or 10.0 miles.
- No split calculation is performed when 0.0 is specified as the current distance value.
- For lap time readings, you can specify either the lap distance (when all the laps are the same distance) or the total race distance.
- For split time readings, you can specify the time race distance only. Though the watch will indicate a split time when you race, a split timing, only will be based on the total race distance, and so they will not indicate actual intermediate split splits.
