PUBLIC HEALTH, EPIDEMIOLOGY, AND HEALTH STATISTICS

Modular Learning Outcomes

Upon successful completion of this module, the student will be able to satisfy the following outcomes:

- Case
- Describe epidemiology of a communicable disease..
- SLP
- Research literature for relevant information including health and disease statistics to assess significance of a communicable disease..
- Discussion
- Identify steps for gathering relevant information to determine disease outbreak.

Module Overview

Background and Context

The BHS499 capstone course challenges you to synthesize what you have learned in your BSHS program's core courses to develop a plan that addresses a "real-world" topic in health care. As you proceed through the assignments, you will have an opportunity to apply the knowledge and skills gained from your previous coursework while conducting research to interpret the issues and implications of a health/healthcare topic from the perspective of a health professional, and developing a plan to address the issue.

Throughout the course, you will be expected to incorporate several information resources from different media (such as professional and scholarly sources, educational videos, news broadcasts and articles, consumer information sources, and interviews with health professionals) to this project and to evaluate the relative merits of competing resources with respect to the expectations of this project.
