

11. Draw a pedigree that represents Leah married to Aiden, with 2 sons and 1 daughter. Their son, Scott, married April and had Sutton (a boy) and Kendall (a girl). Their daughter, Karen, married Harry and had Eli (a son) and Tariq (a son). Please label the pedigree with the names of the people.

12. When working through a pedigree, the first thing you need to do is figure out which characteristic is dominant – the shaded one or the un-shaded one. Then you need to choose a letter (let's use A) and begin assigning genotypes. Remember that recessive individuals are always homozygous, so assign their genotypes first. Then go back and look at all of the dominant individuals. For some, you will only be able to determine one allele of the genotype, so just write the one capital allele followed by a question mark (A?).

- Which characteristic is dominant?
black
- Which characteristic is recessive?
white
- Determine the genotypes of all individuals. You will have three "A?". Write your Genotypes beneath each individual.

Identify the following pedigree charts as autosomal, X-linked, recessive, and dominant. Please explain your answer.

13. Is the following autosomal or X-linked? Is it dominant or recessive? Please explain.

X-linked recessive

More males affected than females

Offspring show disorder/trait but parents don't

14. Is the following autosomal or X-linked? Is it dominant or recessive? Please explain.

autosomal dominant

50% of males & 50% of females affected

Both parents & offspring show trait

15. Is the following autosomal or X-linked? Is it dominant or recessive? Please explain.

X-linked recessive

See reasons in question #13

16. If a child has an autosomal dominant trait, what can you say about the parents?

IF the child has the disorder then one of the parents must have the disorder.

Mcq About Human Gentics Pedigree Analysis With Answer

Philip Anderson, Barry Ganetzky

Mcq About Human Genetics Pedigree Analysis With Answer:

Zoology for B.Sc. Students Semester I: NEP 2020 Uttar Pradesh VK Agarwal, This textbook has been designed to meet the needs of B Sc First Semester students of Zoology as per the Common Minimum Syllabus prescribed for all Uttar Pradesh State Universities and Colleges under the recommended National Education Policy 2020 NEP 2020 It comprehensively covers two papers namely Theory paper on Cytology Genetics and Infectious Diseases and Practical paper on Cell Biology Cytogenetics Lab While this textbook gives a thorough overview of genetics and infectious diseases it aptly covers important topics such as structure and functions of cell organelles nucleus cell cycle cell division human chromosomes its pattern of inheritance The text part also discusses the pathogenic organisms and the infectious diseases caused by them Practical part covering Cell Biology Cytogenetics Lab has been presented systematically to help students achieve sound conceptual understanding and learn experimental procedures
