

Meade® ETX® Astro Telescopes

Let Meade high-resolution optics and revolutionary Autostar™ capability take you on an automated guided tour of the Solar System, the Galaxy, and beyond.

Now even the most novice amateur astronomer can locate and explore the planets, galaxies, and nebulae, as well as star clusters, asteroids, and comets, all at the push of a button. Because, "more than any other telescope, the Meade ETX has revolutionized amateur astronomy. Since it was introduced in 1996 it has become the standard by which others are judged, combining low price with optical excellence, a solid mounting, and...computerized 'GO TO' facilities."* Meade ETX Astro Telescopes, in four apertures, bring the full range of celestial images to your eye with astonishing levels of clarity, resolution, and definition.

ETX-70AT Astro Telescope

All of the major planets except Pluto are easily observable through the ETX-70AT. Study Saturn and its ring system; the primary cloud belts of Jupiter as well as its four major satellites; the Moonlike phases of Mercury and Venus; prominent features on Mars; the starlike images of the distant planets Uranus and Neptune. The Moon stands out in stark, almost three-dimensional detail — craters, mountain ranges, and fault lines. In our galaxy the telescope displays hundreds of nebulae, star clusters,

"In decades past, the astronomy world has bemoaned the lack of an effective, affordable beginner's telescope...the Meade ETX-70AT refractor is perhaps the first innovative beginner's telescope for the present generation. And Meade surmounted significant challenges to produce them: Rather than churning out merely a good set of optics, [the ETX-70AT] provides a user-friendly mini-observatory for the computer age...After using the telescope for a few hours, the sea change in how technology will affect beginning observers struck me hard...the potential of the computerized generation is startling. With the ETX-70AT, in a matter of minutes, I could see two or three dozen objects in rapid succession, finding them effortlessly and comparing their appearances much more effectively because they were so easy to locate." — from the review in Astronomy, February, 2001.

double and multiple stars, and variable stars — plus dozens of external galaxies in all their variations of form and structure. See the Autostar listing on the facing page for a complete compilation of database objects.

Terrestrial Observing: The Meade ETX-70AT also makes an excellent land-view instrument for the birdwatcher, the naturalist, or for the home with a view. Image quality and resolution typically far exceed levels normally expected of terrestrial telescopes. Terrestrial observers quickly appreciate the advantages afforded by the Autostar hand controller (see below). Using Autostar, many land objects can be readily followed, or tracked, from a distance, using one of nine selectable speeds.

Fork Mount with Dual-Axis Drive System: In conjunction with the telescope's Autostar hand controller, precision worm gear systems on each axis permit smooth pushbutton motions of the telescope. Integrated to one of the fork arms, the telescope's control panel serves as a central connection point for the hand controller (the HBX port), as well as for the RS-232 serial interface adapter (the AUX port), an adapter included with the optional #506 AstroFinder Software and Cable Connector Kit (see *Optional Accessories*, p. 15). Using the RS-232 interface, new or revised software may be downloaded through your PC to the telescope; the positions of Earth satellites may be updated for their

observation through the telescope; and the positions of newly-discovered objects, such as comets, may be accessed by Autostar.

Optical System: The ETX-70AT includes a multi-coated, achromatic objective lens of exclusive Meade design and manufactured of Grade-A crown and flint optical glass components. The lens yields razor-sharp images of astronomical and terrestrial subjects.

Flip-Mirror System: For observing in the standard 90° position, flip the internal, optical flat mirror "up." For terrestrial observing with

The Meade ETX-70AT is provided as standard equipment with all equipment shown, including the full-length #682 Field Tripod.

the optional #933 45° Erecting Prism (see p. 15) or for photography with the optional #64ST T-Adapter, flip the mirror "down."

Ultraportable and Simple to Use: Easy to carry to any observing location, whether a distant mountaintop or your own back yard, the Meade ETX-70AT telescope brings the excitement of astronomy to users of any age. Just place

In the optical design of ETX-70AT, light enters from the right through a 2-element objective lens and travels to a focus at the focal plane. Field stops internal to the optical tube prevent off-axis light from reaching the focal plane, thereby enhancing image contrast.

Martin Peston,2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade s Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope

How to Use a Computerized Telescope is the first handbook that describes how to get your computerized telescope up and running and how to embark on a program of observation. It explains in detail how the sky moves, how your telescope tracks it, and how to get the most out of any computerized telescope. Packed full of practical advice and tips for troubleshooting, it translates the manufacturers' technical jargon into easy-to-follow step-by-step instructions and includes many of the author's tried and tested observing techniques.

So You Want a Meade LX Telescope! Lawrence Harris, 2010-07-20

Computers and Astronomy Perhaps every generation of astronomers believes that their telescopes are the best that have ever been. They are surely all correct. The great leap of our time is that computer-designed and machined parts have led to more accurately made components that give the astronomer ever better views. The manual skills of the craftsman mirror grinder have been transformed into the new-age skills of the programmer and the machine maker. The new products did not end the work of craftsman telescope makers, though. Many highly skilled amateur professional opticians continued to produce good quality mirrors that are still seen today. Amateur-priced telescopes are now capable of highly accurate tracking and computer control that were once only the province of professionals. This has greatly increased the possibilities of serious astronomy projects for which tailor-made software has been developed. Add a CCD camera to these improved telescopes (see Chap 3) and you bring a whole new dimension to your astronomy (see Fig 1.1).

Look Before You Leap But first a word of caution. Unless you are already familiar with astronomy and basic telescopes, it is not wise to start spending large amounts of money on a featured telescope. Such an instrument might otherwise be subsequently abandoned due to a perceived overcomplexity coupled with a waning interest.

Direct Support and General Support Maintenance Manual Including Repair Parts and Special Tools List, 1993 *Care of Astronomical Telescopes and Accessories* M. Barlow Pepin, 2004-12-17

Commercially made astronomical telescopes are better and less expensive than ever before, and their optical and mechanical performance can be superb. When a good quality telescope fails to perform as well as it might, the reason is quite probably that it needs a little care and attention. Here is a complete guide for anyone who wants to understand more than just the basics of astronomical telescopes and accessories and how to maintain them in the peak of condition. The latest on safely adjusting, cleaning, and maintaining your equipment is combined with thoroughly updated methods from the old masters. Here too are details of choosing new and used optics and accessories, along with enhancements you can make to extend their versatility and useful lifetime. This book is for you. Really. Looking after an astronomical telescope isn't only for the experts, although there are some things that only an expert should attempt, and every serious amateur astronomer will find invaluable information here gleaned from Barlow Pepin's many years' experience working with optical instruments.
