discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Inequality and Flourishing Mariama Ifode-Blease, 2022-06-30. It is no surprise that Christians have long been involved in education; the quest for human flourishing and wholeness is at the heart of the gospel, and education is critical to that quest. Good education has the power to transform our relationships with ourselves, with each other, with and within communities, and ultimately between nation states. But what is surprising is our theological silence in the face of the deep injustices which lie at the heart of our education system. In *Inequality and Flourishing*, Mariama Ifode Blease explores and exposes these inequalities and calls for a greater remembrance of the bountiful and daunting gift of stewardship we have as we educate young people. Drawing on interviews, she offers a fresh vision of education as being about giving children the best tools to be stewards of their minds and bodies, our communities, and ultimately our planet.
