Conversation Analysis and Language Alternation Anna Filipi,Numa Markee,2018-10-15 This volume brings together researchers in conversation analysis who examine the practice of alternating between English and German Italian Spanish Swedish and Vietnamese in the classroom The collection shows that language alternation is integral to being and learning to become a bilingual and that being and learning to become a bilingual are accomplished through a remarkably common set of interactional objects and actions whose sequential organisations are quite similar across languages and educational sectors This volume therefore shows that having recourse to more than one shared language provides an important resource for
