Handbook of Research on Inclusive and Accessible Education Maguvhe, Mbulaheni Obert, Mpya, Nwacoye Gladness, Sadiki, Marubini Christinah, 2024-02-16 In the vast expanse of education a pervasive issue remains in the marginalization and lack of visibility of individuals with disabilities Despite a strong desire for inclusivity recent research suggests that fewer than 5% of children with disabilities in 51 countries across sub Saharan Africa and South Asia are enrolled in primary school This exclusion is not solely in enrollment numbers even those who manage to attend face learning environments ill equipped to adapt to their needs leading to further isolation Girls with disabilities in particular endure heightened vulnerability to abuse reflecting a systemic failure to provide an environment that fosters equality dignity and respect for all The Handbook of Research on Inclusive and Accessible Education emerges as an inspiration for change providing a profound solution to the persistent issue of exclusion The book encapsulates a collective effort to reimagine education It advocates for a paradigm shift moving away from the confinement of special schools and towards inclusive mainstream settings By addressing controversies sharing successes and outlining prospects the book serves as a comprehensive guide for special school governing bodies curriculum advisors university lecturers and all stakeholders committed to reshaping education

Identity, Trauma, Sensitive and Controversial Issues in the Teaching of History Hilary

Cooper, Jon Nichol, 2015-10-13 History Education is a politically contested subject It can be used to both promote xenophobia and to develop critical thinking multiple perspectives and tolerance Accordingly this book critically examines complex issues and constructivist approaches that make history relevant to students understanding of the modern world As such it has global appeal especially in North and South America Canada Europe and Asia The book s authors address the major challenges that History Education faces in an era of globalisation digital revolution and international terror nationalism and sectarian and religious conflict and warfare Central to this volume are controversial issues trauma and questions of personal and national identity from a wide range of international settings and perspectives The research in this book was undertaken by leading history educators from every continent Their interdisciplinary research represents an important contribution to the teaching of social sciences social psychology civic education programmes history and history education in schools colleges and universities The book offers new approaches to history educators at all levels In addition the chapters offer potential as required reading for students to both develop an international perspective and to compare and contrast their own situations with those that the book covers Section I considers issues related to identity how can history education promote social coherence in multicultural societies in societies divided by sectarianism or countries adapting to regime changes whether Communist or Fascist including for example South Africa previously Communist countries of Eastern Europe and previous dictatorships in South America and Western Europe It discusses such questions as How important is it that students learn the content of history through the processes of historical enquiry What should that content be and who should decide it educators or politicians What is the role of textbooks and who should write and select them Should history be taught as a discrete discipline or as part of a citizenship or social sciences curriculum Sections II and III explore ways in which memory of sensitive issues related to the past to war or to massacres may be addressed Are there new methodologies or approaches which make this possible How can students understand situations involving intolerance and injustice The Holocaust ,2004 The Holocaust lessons for humanity provides a historical overview of the Holocaust The Global Testing Culture

William C. Smith, 2016-01-04 The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and

neoliberalism Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences Science Achievement and Student Interest Jan-Åke Engström,1994 **Resources in Education** ,1996 Goals for Educational Policy in Sweden Organisation for Economic Co-operation and Development,1980 *The software catalog microcomputers* Menu (Firm) (Fort Collins, Colo.),1989 **Drum** ,2009-04 *Science Reporter* ,1984 **Staff Papers** United States.
