**Higher Expectations** Derek Bok, 2022-05-17 How our colleges and universities can respond to the changing hopes and needs of society In recent decades cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society In this landmark book Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty first century Prior to this century most psychologists thought that creativity empathy resilience conscientiousness and most personality traits were largely fixed by early childhood What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life How prepared are educators to cultivate these qualities of mind and behavior What do they need to learn to capitalize on the possibilities Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods What can be done to hasten the process of innovation and application In providing answers to these questions Bok identifies the hurdles to institutional change proposes sensible reforms and demonstrates how our colleges can help students lead more successful productive and meaningful lives

**Parasitic Personhood and the Ontology of Eating** Lisa Heldke,2025-08-28 Humans must eat and our eating involves us in a cascade of eating relationships that leave life and death biting into each other These realities should but often do not profoundly shape our understanding of personhood This book explores parasitic personhood an alternative to atomistic individualism that acknowledges the biological individual as a network of persistent biological relationships a holobiont and draws insight from the astonishing frequency and variety of parasitic feeding relationships What happens to our conception of personhood if we consider parasitism as more than just a threat to our health Parasitism is a remarkably common form of life however we tend to think of parasites only as dangerous pestilential organisms that should be eliminated What if parasitism in particular persistent eating relationships that threaten to destabilize host organisms were instead the model in terms of which we understood what it means to be a person What if we acknowledged the ineliminability indeed the centrality of parasitism to life and embraced both the persistent eating and the precarity that they entail as central to our understanding of personhood In advocating for parasitic personhood this book joins a history of efforts to uproot atomistic individualism the remarkably durable understanding of personhood that is aptly portrayed by its most well known eighteenth century model the billiard ball smoothly self contained with relationships decidedly external to it The parasitic alternative conceives persons as collections of organisms in relationships that are by turns and all at once essential precarious definitive destabilizing stable and shifting The book asks in what does parasitic personhood consist It goes on to examine some implications of this conception of personhood how is moral agency constituted for the parasitic person and how does parasitic personhood expand our understanding of aesthetic engagement and appreciation This book will absorb anyone who is interested in thinking about the metaphysical significance of their need to eat and their reliance on myriad other organisms to enable them to do so It will engage students and scholars of food and eating particularly those working on the metaphysics of food food and personhood fermentation and the microbiome as well as philosophers considering the ontological significance of food and eating
