Character Education for 21st Century Global Citizens Endah Retnowati, Anik Ghufon, Marzuki, Kasiyan, Adi Pierawan, Ashadi, 2018-09-25 Character Education for 21st Century Global Citizens contains the papers presented at the 2nd International Conference on Teacher Education and Professional Development InCoTEPD 2017 Yogyakarta Indonesia 20 21 October 2017 The book covers 7 topics Values for 21st century global citizens Preparing teachers for integrative values education Teacher professional development for enhanced character education Curriculum syllabus lesson plan learning materials development for integrated values education Developing learning activities tasks strategies for character education Assessing student s character development values acquisition assessment Creating managing conducive school culture to character education Educational Neuroscience, Constructivist Learning, and the Mediation of Learning and Creativity in the 21st Century Layne Kalbfleisch, 2015-05-28 The advent of educational neuroscience a transdisciplinary exercise emerging from cognitive neuroscience and educational psychology is the examination of physiological processes that undermine support and enhance the capacities to learn and create The physiological underpinnings of learning and creativity each impact human ability and performance and mediate the processes of becoming educated expert and valued Evidence of learning provides support to an ongoing canon process system field or domain while evidence of creativity results in an elaboration or departure from an ongoing canon process system field or domain Educational neuroscience extends a challenge to scholars from multiple contexts to engage in the characterization and exploration of human ability and performance in these realms The role of context both environmental and interoceptive is an integral part of efforts in educational neuroscience and in theories of constructivist learning to contribute ecologically valid insight to the pragmatic processes of learning and creativity Examination at this level of specificity is vital to our ability to educate and support human potential in the 21st century This Research Topic examines the neural basis of cognitive states and processes that influence knowledge and skill acquisition tied to the demonstration of human ability and performance across individual differences and in multiple contexts including STEM learning and the arts Democratic Incongruities D. Judge, 2014-03-07 Clear disparities exist between notions of representative democracy and political practice in Britain Alternative models of democracy however have their own incongruities in trying to marry representation and democracy This book analyses the mismatches in democratic theories and between theory and practice in British representative democracy **Capitalism on Campus** Ron Roberts, 2018-11-30 Capitalism on Campus examines the university s journey into market hands and the sexual sell off of students which has come with it It raises critical questions about the forces which conjoin higher education to both sex work and declining academic freedom In so doing it questions the role our institutions of learning have in the cultivation of resistance to capitalism This is a call to rediscover the emancipatory potential of knowledge **Policy-Making in the GCC** Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East

Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike
